Semiotic Landscapes Language Image Space:

Semiotic Landscapes Adam Jaworski, Crispin Thurlow, 2010-04-08 *Semiotic Landscapes* is an exciting addition to the study of linguistic landscapes. It looks at how landscape generates meaning and combines three major areas of scholarly interest: each concerned with central dimensions of contemporary life: language and visual discourse, spatial practices, and also the changes brought about by global capitalism and ever-increasing mediatization. The editors look at the textual/discursive construction of place, the use of space as a semiotic resource, the extent to which these processes are shaped by wider economic and political re-orderings of post-industrial or advanced capitalism, changing patterns of human mobility and transnational flows of ideas and images. The collection demonstrates the way written discourse interacts with all other discursive modalities: visual images, nonverbal communication, architecture, and the built environment. From the red light districts of Switzerland to the transgressive public art of graffiti, all landscape can be seen to generate meaning. *Semiotic Landscapes* looks at how and why, and places this meaning generation in an interdisciplinary and thoroughly modern cross-section of global trends.

Reterritorializing Linguistic Landscapes David Malinowski, Stefania Tufi, 2020-01-23 A historically spatially and methodologically rich sub-field of sociolinguistics, Linguistic Landscapes (LL) is a rapidly evolving area of research and study. With contributions by an international team of experts from the USA, Europe, the UK, South Africa, Israel, Hong Kong, and Colombia, this volume is a cutting-edge interdisciplinary account of the most recent theoretical and empirical developments in this area. It covers both the conceptual tools and methodologies used to define and question, and case studies of real-world phenomena to showcase Linguistic Landscapes methods in action. Divided into four parts, chapters bring into dialogue themes relating to reterritorialization practices and the productive nature of boundaries and spaces. This book considers the contemporary challenges facing the field: the politics and processes of identifying and demarcating sites of research, and the ethics and pedagogical applications of LL research. With comprehensive lists of further reading, extended discussion questions, and suggestions for independent research at the end of each chapter, this is an essential reference work for all LL scholars and students who wish to keep abreast of the current state of the art.
