Grounded Robert M. Farley, 2014-03-11 The United States needs airpower but does it need an air force In **Grounded** Robert M Farley persuasively argues that America should end the independence of the United States Air Force USAF and divide its assets and missions between the United States Army and the United States Navy In the wake of World War I advocates of the Air Force argued that an organizationally independent air force would render other military branches obsolete These boosters promised clean easy wars airpower would destroy cities beyond the reach of the armies and would sink navies before they could reach the coast However as Farley demonstrates independent air forces failed to deliver on these promises in World War II the Korean War the Vietnam War the first Gulf War the Kosovo conflict and the War on Terror They have also had perverse effects on foreign and security policy as politicians have been tempted by the vision of devastating airpower to initiate otherwise ill considered conflicts The existence of the USAF also produces turf wars with the Navy and the Army leading to redundant expenditures nonsensical restrictions on equipment use and bad tactical decisions Farley does not challenge the idea that aircraft represent a critical component of America s defenses nor does he dispute that especially now with the introduction of unmanned aerial vehicles airpower is necessary to modern warfare Rather he demonstrates that the efficient and wise use of airpower does not require the USAF as presently constituted An intriguing scholarly polemic **Grounded** employs a wide variety of primary and secondary source materials to build its case that the United States should now correct its 1947 mistake of having created an independent air force *The Athenæum* ,1861

World War II Snipers Gary Yee, 2022-05-04 This illustrated military history reveals the untold story of WWII snipers from training and firearms to combat and field operations Though snipers played a significant role in the battlefields of World War II they are often overlooked by historians In this volume military historian and firearms expert Gary Yee offers a comprehensive and fully illustrated narrative of snipers across the major theaters of conflict Europe the Eastern Front and the Pacific Drawing on memoirs archives wartime photographs and eyewitness accounts World War II Snipers presents a compelling and authoritative study Each of the warring countries had its own unique methodology for selecting and training snipers They recruited hunters outdoorsmen competitive shooters and military veterans to take on this highly skilled role They were deployed to ensure battlefield dominance and instill a paralyzing fear among the enemy Yee tells the stories of these soldiers who were both admired and at times reviled by their own comrades He also includes a lengthy chapter on the sniper rifles and other equipment issued to snipers **J-20 Mighty Dragon** Abraham Abrams, 2024-12-31 The J 20 fifth generation stealth fighter program has epitomised China s rise from a laggard in combat aviation into a potential world leader J 20 Mighty Dragon Asia s First Stealth Fighter in the Era of China s Military Rise details the J 20 s technologies capabilities production timeline design priorities roles evolution and the formations and locations where it has been deployed the ways other countries have responded to it and how the last 30 years of China s industrial and technology sector s

modernisation positioned the country to produce what may well now be the world's top air superiority fighter. The J 20 program is the most high profile indicator of a turning point in the balance of power between China and the United States and has produced by far the most capable fighter that America or its allies could face in a potential conflict. An assessment of the history of Chinese air superiority capabilities and how the Korean War in particular has influenced the country to place a very strong emphasis on the need to field a leading fighter for air to air combat thus provides an important deeper understanding of the program. Important context to understanding the J 20's significance and its current global standing is provided by brief assessments of the positions of the Russian and American fighter industries. The parallel development of supporting assets from aerial tankers to electronic warfare planes is also explored for a better understanding of the much transformed Chinese fleet which J 20s are being inducted into. The program is also shown to have had a particularly significant influence in the United States ranging from placing discourse on the F 35's modernisation and on sixth generation fighter development in an entirely new context to stimulating the formation of new counter stealth aggressor training units development of new air to air missiles and the acquisition of E 7 flying radar aircraft among many other responses to the new challenge. J 20: Mighty Dragon Asia's First Stealth Fighter in the Era of China's Military Rise is the first volume in the new Technology War series and is extensively illustrated with colour photographs throughout and specially commissioned colour artworks.

The Evolution of the US Air Force Israel Guy, 2024-08-05 This book looks at the history of the US Air Force through the lens of its lack of preparedness for major wars which is shown to be a result of its organizational culture. The U S Air Force is probably the most powerful military force in history both in its destructive firepower and in its ability to project it globally. Yet despite its unparalleled power the Air Force entered its first three pivotal conflicts World War II the Korean War and the Vietnam War unprepared. But surprisingly it was remarkably well prepared for its fourth major war the Gulf War of 1991. Could there be an underlying trait or characteristic which influenced the Air Force between the wars that historically caused the US Air Force to be unprepared for war or prepared for the wrong type of war? Surprisingly there is such a factor which was quite prominent in the Air Force's complex identity its organizational culture. Besides providing a historical description of the Air Force this book demonstrates clearly how its organizational culture evolved and how it caused the US Air Force to be prepared for the wrong war. It also shows that when the organizational culture changed the Air Force changed its focus and arrived prepared for the following war the 1991 Gulf War. This book will be of interest to students of air power strategic studies US public policy and security studies in general.
