Conservation and Development Andrew Newsham, Shonil Bhagwat, 2015-12-22 Conservation and development share an intertwined history dating back to at least the 1700s But what are the prospects for reconciling the two and how far have we come with this project This book explores these questions through a detailed consideration of the past present and future of the relationship between conservation and development Bringing to bear conceptual resources from political ecology social ecological systems thinking and science and technology studies Conservation and Development sets this relationship against the background of the political and economic processes implicated in environmental degradation and poverty alike Whilst recognising that the

need for reconciling conservation and development processes remains as compelling as ever it demonstrates why trade offs are more frequently encountered in practice than synergies It also flags alternative visions for conservation and development obscured or ignored by current framings and priorities Bringing together policy and theory Conservation and Development is an essential resource for undergraduate and postgraduate students and a useful reference for researchers in related fields Each chapter contains a reading guide with discussion questions The text is enlivened by a number of new case studies from around the world A must read for anyone interested in understanding the history current state and projections for future shifts in the relationship between conservation and development *Tourism and Development in Sub-Saharan Africa* Marina Novelli,2015-09-16 Over the past 20 years the perception of tourism as an effective contributor to socio economic development in the developing world has propagated with many viewing tourism as a provider for poverty alleviation and towards other UN Millennium Development Goals Over the same period readers have become familiar with the paradoxes complexities and inequalities of tourism in relation to development wealth creation growth redistribution governance and hosts guests relationships This volume further extends this critical debate with a much needed cohesive publication on Sub Sahara Africa SSA In an era of fluctuating tourist arrivals at global level the growth of tourism in SSA requires deeper consideration in terms of its inconsistent and questionable implications at local level Taking as a central theme the debate on whether tourism should be used in development efforts this book examines the way in which tourism has controversially become the way forward to development in several SSA locations and assesses bottlenecks to sustainable development as well as dilemmas and challenges faced by those SSA destinations seeking to achieve development through tourism It offers an explicit set of chapters adopting a multi disciplinary approach drawing upon tourism studies human geography sociology anthropology political economy development and environmental studies and integrates case studies authored by local African practitioners and academics to produce a book that gave voice to local experts on local realities Combining an overview of key theories concepts contemporary issues and debates as well as practical insights from a wide range of regions in SSA this book will be a valuable resource for those investigating the role of tourism in development Nesting in reptiles: natural and anthropogenic threats and evolutionary responses J.
