Mobile Multimedia Dian Tjondronegoro, 2012-01-20 As multimedia enabled mobile devices such as smart phones and tablets are becoming the day to day computing device of choice for users of all ages everyone expects that all mobile multimedia applications and services should be as smooth and as high quality as the desktop experience The grand challenge in delivering multimedia to mobile devices using the Internet is to ensure the quality of experience that meets the users expectations within reasonable costs while supporting heterogeneous platforms and wireless network conditions This book aims to provide a holistic overview of the current and future technologies used for delivering high quality mobile multimedia applications while focusing on user experience as the key requirement The book opens with a section dealing with the challenges in mobile video delivery as one of the most bandwidth intensive media that requires smooth streaming and a user centric strategy to ensure quality of experience The second section addresses this challenge by introducing some important concepts for future mobile multimedia coding and the network technologies to deliver quality services The last section combines the user and

technology perspectives by demonstrating how user experience can be measured using case studies on urban community interfaces and Internet telephones Design of Digital Video Coding Systems Jie Chen,Ut-Va Koc,KJ Ray Liu,2001-10-31 A discussion of a compressed domain approach for designing and implementing digital video coding systems which is drastically different from the traditional hybrid approach It demonstrates how the combination of discrete cosine transform DCT coders and motion compensated MC units reduces power consumption and hardware complexity *5G Multimedia Communication* Zoran S. Bojkovic,Dragorad A. Milovanovic,Tulsi Pawan Fowdur,2020-10-27 In bringing to the readers the book 5G Multimedia Communication Technology Multiservices and Deployment the aim is to present current work and direction on the challenging subject of multimedia communications with theoretical and practical roots The past two decades have witnessed an extremely fast evolution of mobile cellular network technology The fifth generation of mobile wireless systems has achieved the first milestone toward finalization and deployment by 2020 This is vital to the development of future multimedia communications Also it is necessary to consider 5G technology from the performance point of view by analyzing network capabilities to the operator and to the end user in terms of data rate capacity coverage energy efficiency connectivity and latency The book is divided into three major parts with each part containing four to seven chapters Critical enabling technology Multiservices network Deployment scenarios The first part discusses enabling technologies such as green communication channel modeling massive and distributed MIMO and ML based networks In the second part different methodologies and standards for multiservices have been discussed Exclusive chapters have been dedicated to each of the open research challenges such as multimedia operating in 5G environment network slicing optimization mobile edge computing mobile video multicast broadcast integrated satellite and drone communication The third part paved the way to deployment scenarios for different innovative services including integration of a multienergy system in smart cities intelligent transportation systems 5G connectivity in the transport sector healthcare services 5G edge based video surveillance and challenges of connectivity for massive IoT in 5G and beyond systems The book is written by experts in the field who introduced scientific and engineering concepts covering the 5G multimedia communication areas The book can be read cover to cover or selectively in the areas of interest for the readers Generally the book is intended for novel readers who could benefit from understanding general concepts practitioners who seek guidance into the field and senior level as well as graduate level engineering students in understanding the process of today s wireless multimedia communications
