The Core Leigh A. Bortins, 2025-10-16 In the past correct spelling the multiplication tables the names of the state capitals and the American presidents were basics that all children were taught in school Today many children graduate without this essential knowledge Most curricula today follow a haphazard sampling of topics with a focus on political correctness instead of teaching students how to study Leigh Bortins a leading figure in the homeschooling community is having none of it She

believes that there are core areas of knowledge that are essential to master Without knowing the multiplication tables children can't advance to algebra Without mastery of grammar students will have difficulty expressing themselves Without these essential building blocks of knowledge students may remember information but they will never possess a broad and deep understanding of how the world works In *The Core* Bortins gives parents the tools and methodology to implement a rigorous thorough and broad curriculum based on the classical model including Rote memorization to cement knowledge Systematic learning of geography historical facts and timelines Reading the great books and seminal historical documents instead of adaptations and abridged editions Rigorous training in math and the natural sciences **End of Story** Crispin Sartwell, 2000-11-02 Argues that the academy's obsession with language and in particular with narrative has become a sort of disease The Mediatization of the Artist Rachel Esner, Sandra Kisters, 2018-01-31 This book offers trans historical and trans national perspectives on the image of the artist as a public figure in the popular discourse and imagination Since the rise of notions of artistic autonomy and the simultaneous demise of old systems of patronage from the late eighteenth century onwards artists have increasingly found themselves confronted with the necessity of developing a public persona In the same period new audiences for art discovered their fascination for the life and work of the artist The rise of new media such as the illustrated press photography and film meant that the needs of both parties could easily be satisfied in both words and images Thanks to these new media the artist was transformed from a simple producer of works of art into a public figure The aim of this volume is to reflect on this transformative process and to study the specific role of the media themselves Which visual media were deployed to what effect and with what kind of audiences in mind How did the artist critic photographer and filmmaker interact in the creation of these representations of the artist's image
