adversely affected by the steady decline in physical sales of music For the audience on the other hand it is an opportunity to escape from everyday life multi sensory contact with art an activity that stands for full body participation a cultural phenomenon that drags people out of their homes like no other There is one common denominator linking the above mentioned features of contemporary music festivals namely the world of values This is evident from the non accidental locations festivals spaces design planning and the line ups created consciously with great care The organisers missions logos and other symbolic organisational artefacts communicate specific values These values are explicitly mentioned by artists and audiences they can be easily identified in online forums and media reports participant behaviour festival rituals and additional festival programs are shaped on the basis of values and cooperation is built between the festival and the local community As the reader will quickly realize numbers and statistics sit alongside descriptions and quotations in this book and the organisers statements are accompanied by the opinions of academics but above all the festival audience is given a voice both through quotations and their drawings This voice is by no means uniform as it turned out that research into values was often transformed into a pretext for spinning tales about one s life situation one s political preferences and one s understanding of freedom and responsibility Memories were mixed with declarations joy with regret curses with dreams prose with poetry Thomas Pettitt was not wrong in noting that Social history has learnt to appreciate festival as a valuable window on society and its structures The authors have tried to open all the windows available Students and researchers in the fields of cultural anthropology social psychology folklore studies comparative religion sociology of culture cultural policy cultural history and cultural management will find this book highly interesting *Learning & Knowledge* Robert McCormick, Carrie Paechter, 1999-03-23 This textbook is founded on the idea of learning as knowledge construction and the implications of this for the nature of knowledge and for the way it is acquired The first section examines the nature of knowledge from several perspectives The dominant theme is that views of learning closely relate to views of knowledge The second section considers what it is to be knowledgeable Expertise and types of knowledge are considered using examples from different phases of education and subject areas The final part of the book focuses on learning within domains and what this means from different subject perspectives *Learning and Knowledge is a Course Reader for The Open University course E836 Learni* *Managing Organisational Success in the Arts* David Stevenson, 2018-10-10 The creative and cultural industries are a dynamic and rapidly expanding field of enterprise Yet all too often the dominant narrative about arts organisations is one of crisis collapse and closure This edited collection seeks to challenge that narrative through pursuing a focus on organisational success in the management of creative and cultural organisations This book offers a robust and in depth analysis of nine international case studies exploring how different organisations have achieved their objectives through effectively managing their resources Spanning a broad cross section of the cultural sector including Theatres Multi Arts Venues Performing Arts Companies Museums and Galleries and Festivals and Events these cases highlight the importance of

examining an individual organisation's success in relation to its environmental context revealing not only how arts organisations work in practice but also providing inspiration and encouragement for those wishing to emulate such success. With an explicit focus on examining theory in practice this unique collection will be of great interest to students, academics and practitioners alike. While traditional approaches have often been overly theoretical this pragmatic approach will help students to gain a richer understanding of how to manage cultural and creative organisations more effectively.

Humor and Nonviolent Struggle in Serbia Janjira Sombatpoonsiri, 2015-10-29 In this highly original and engaging work Sombatpoonsiri explores the nexus between humor and nonviolent protest aiming to enhance our understanding of the growing popularity of humor in protest movements around the world. Drawing on insights from the pioneering Otpor activists in Serbia, she provides a detailed account of the protesters' systematic use of humor to topple Slobodan Milošević in 2000. Protest newsletters, documentaries of the movement and interviews with activists combine to illustrate how humor played a pivotal role by reflecting the absurdity of the regime's propaganda and in turn by delegitimizing its authority. Sombatpoonsiri highlights the Otpor activists' ability to internationalize their nonviolent crusade influencing youth movements in the Ukraine, Georgia, Iran and Egypt. Globally, Otpor's successful use of humor has become an inspiration for a later generation of protest movements.

Organising Music Nic Beech, Charlotte Gilmore, 2015-02-05 Organisational theorists have become increasingly interested in the creative industries where practices that are commonplace are of particular interest to organisations in other sectors as they look for new ways to enhance performance. Focusing on the music industry this book sets up a unique dialogue between leading organisational theorists and music professionals. Part I explores links between organisation theory and the creative industries literature concentrating on practices of organising and knowledge mobilisation followed by an in-depth discussion of key theoretical concepts by subject experts. Part II provides a diverse range of tales from the field including examples from classical orchestras, folk, indie and punk. The concluding chapter examines the shared dialogue to reveal what practice in the musical field can learn from organisational theory and vice versa. This innovative book will interest graduate students and researchers in the fields of organisation studies, music management and the creative industries.
