PHP 7, MySQL 8, and MariaDB Website Databases* Adrian W. West, Steve Prettyman, 2018-09-28 Build interactive database
driven websites with PHP 7 MySQL 8 and MariaDB The focus of this book is on getting you up and running as quickly as
possible with real world applications In the first two chapters you will set up your development and testing environment and
then build your first PHP and MariaDB or MySQL database driven website You will then increase its sophistication security
and functionality throughout the course of the book The PHP required is taught in context within each project so you can
quickly learn how PHP integrates with MariaDB and MySQL to create powerful database driven websites Each project is fully
illustrated so you will see clearly what you are building as you create your own database driven website You will build a form
for registering users and then build an interface so that an administrator can view and administer the user database You will
create a message board for users and a method for emailing them You will also learn the best practices for ensuring that your
website databases are secure Later chapters describe how to create a product catalog and a simple e commerce site You will
also discover how to migrate a database to a remote host The final chapter will demonstrate the advantages of migrating to
Oracle s MySQL 8 You will be shown step by step migration directions along with a demonstration of the tools available in
SQL Workbench Because you are building the interactive pages yourself you will know exactly how MySQL MariaDB and
PHP all work together and you will be able to add database interactivity to your own websites with ease What You Will Learn
