In this context a lone actor or lone wolf is someone who individually prepares or commits violent acts in support of an ideology group or movement but who is acting outside of the command structure and without the assistance of any group. Up to now these individual acts have been seen as almost impossible to forecast but it is nevertheless important to develop a responsible security policy which takes them into account and incorporates planning for counteraction prevention and response. This book presents papers written by leading experts in the field which reflect the subjects presented at the workshop Lone Actors An Emerging Security Threat part of the NATO Science for Peace and Security Programme held in Jerusalem in November 2014. The papers are divided into five sections: the threat of lone actor terrorism; case studies; countering and responding to the threat; legal and ethical aspects; and foresight and policy aspects. The insights, information and recommendations shared in this book will be of interest to all those involved in developing a more efficient response policy to this emerging threat. **Critical Care Transport** American Academy of Orthopaedic Surgeons (AAOS), American College of Emergency Physicians (ACEP), UMBC, 2022-03-17 Published in conjunction with the American Academy of Orthopaedic Surgeons AAOS and the American College of Emergency Physicians ACEP Critical Care Transport offers cutting edge content relevant to any healthcare provider training in critical care transport.
