Data collection used for a population.

census

The characteristic of population based on all units is called parameter while the measure of sample observation is called statistic.

True

Statistics is only the science of uncertainty and not the technology of extracting information from data.

False

The mean is sensitive to any change in value, unlike the median and mode, where a change to an extreme or uncommon value usually has no effect.

True

What is a number or attribute computed for each member of a population or a sample?

Measurement

Statistics help predicts the future course of action of the phenomena.

Forecasting

Which is considered as qualitative data?

a. The texture of a rock

Descriptive Statistics is the branch of statistics that involves organizing, displaying and describing data.

True

Which among the set is bimodal?

{55, 44, 33, 22, 11}

Example of this are number of episodes of respiratory arrests or the number of re-intubations in an intensive care unit.

c. Discrete Data

Standard Deviation is a measure of how spread out is the distribution.

False

It aims to describe various aspects of the data obtained in the study.

c. Descriptive Statistics

It is used to make predictions or comparisons about a larger group (a population) using information gathered about a small part of that population.

d. Inferential Statistics

The statistics are presented in a indefinite form so they also help in condensing the data into important figures.

False

The randomly selected 100 students for a survey is called a population

False

Which among the data is a sample?

c. One section out of all IT Students

It means a subgroup of the members of population chosen for participation in the study
