

The Business Objects Query Builder Guide

Introduction

This guide provides a comprehensive overview of the Business Objects Query Builder. It covers the basic concepts, the user interface, and the various features available to users. The guide is intended for users who are new to the Query Builder and need to understand its capabilities and how to use it effectively.

Getting Started

The first step in using the Query Builder is to create a new query. This can be done by clicking on the "New" button in the top-left corner of the interface. Once a new query is created, the user can select the data source and the fields to be included in the query. The user can also specify the criteria for the query, such as the date range and the status of the records.

The Query Builder interface is designed to be user-friendly and intuitive. It includes a variety of tools and features that make it easy to create and modify queries. The user can view the results of the query in a table, a chart, or a report. The user can also export the results to a file or print them.

The Query Builder is a powerful tool that can be used to create a wide variety of queries. It is easy to learn and use, and it provides a high level of flexibility and control. The user can create queries that are tailored to their specific needs, and they can modify them as needed. The Query Builder is an essential tool for anyone who needs to work with data in Business Objects.
