Silverman, 2015-12-17 Ethnomathematics of Negev Bedouins Existence in Forms Symbols and Geometric Patterns provokes a journey into the world of Negev Bedouins and attests to the beauty and sophistication of mathematics that occurs naturally in their craftwork structures games and throughout Bedouin life The major focus is Bedouin women s traditional craftwork by which they reflect social and cultural activities in their weaving embroidery and similar pursuits Their creations reveal mathematical ideas incorporated in embroidery compositions in repeated patterns of flowers and geometric figures in varying scales The women use ground staked looms stabilized by block stones to make multi color repeating pattern strip rugs in a process practiced for generations An image of this appears in the book s cover photo collage Bedouin men construct dwellings tents desert wells and such They and their children play games attuned to sand and other specific desert conditions These activities of Bedouin women men and children require mathematical thinking and strategic reasoning to achieve desired outcomes The book opens with a narrative of Bedouin history followed by a brief overview of ethnomathematics and concludes with discussion about bridging the gap between school mathematics experiences and those outside school It considers mathematically problematic situations embedded in Bedouin sociocultural heritage likely to appeal to teachers for use with school students The book is intended for a diverse audience from Bedouin communities in different countries to the general public and professionals including ethnomathematicians and mathematics educators Numerous photographs document the examples of Bedouin ethnomathematics They are the subject of considerable analysis and appear throughout the book Sacred Mobilities Avril Maddrell, Alan Terry, 2016-03-03 This collection draws on the Mobilities approach to look afresh at notions of the sacred where they intersect with people objects and other things on the move Consideration of a wide range of spiritual meanings and practices also sheds light on the motivations and experiences associated with particular mobilities Drawing on rich situated case studies this multi disciplinary collection discusses what mobility in the social sciences arts and humanities can tell us about movements and journeys prompted by religious more broadly spiritual and secular sacred practices and priorities Problematising the fixity of sacred places and times as territorially and temporally bounded entities that exist in opposition to profane everyday life this collection looks at the intersection between the embodied emotional spiritual experience of places travel belief practices and communities It is this geographically informed perspective on the interleaving of religious spiritual secular notions of the sacred with the material and more than representational attributes of associated mobilities and related practices which constitutes this volume s original contribution to the field **The Atlas of World Embroidery** Gillian Vogelsang-Eastwood, 2026-02-17 A richly
