Video Theory Andreas Treske, 2015-04-15

Video is a part of everyday life, comparable to driving a car or taking a shower. It is nearly omnipresent, available on demand, and attached to nearly anything anywhere. Online video became something vital and independent. With all the video created by the cameras around us, constantly uploading, sharing, linking, and relating, a blue ocean is covering our planet, an ocean of video. What might look as bluish noise and dust from the far outside might embed beautiful and fascinating living scapes of moving images, objects constantly changing, re-arranging, assembling, evolving, collapsing, but never disappearing, a real cinema. Andreas Treske describes and theorizes these objects, formerly named video, their forms, behaviours, and properties.
