Psyop In Stabilization And Reconstruction Operations Preparing For Korean Reunification:

PSYOP in Stabilization and Reconstruction Operations: Preparing for Korean Reunification, 2005 Psychological operations PSYOP forces should undertake significant doctrinal training and operational reforms to ensure the viability of support provided to U S led stabilization and reconstruction efforts Such operations involve increased civilmilitary interactions and necessitate effective cross cultural communications with not only the indigenous populace but a host of transnational actors as well Today s PSYOP training is reflective of a persisting Cold War mentality that fails to adequately prepare soldiers for effective post conflict situations such as the reunification of the Korean peninsula whether brought about either through a renewal of combat operations or the result of diplomatic means Meanwhile North Korea s formidable and adept propaganda machine has persisted in isolating its populace from external influences for more than a halfcentury Post Korean War generation North Koreans have been successfully indoctrinated since birth to despise the United States Furthermore anti U S sentiment has been on the rise in South Korea for a number of years Under the current training model contemporary psychological operations forces are ill prepared to conduct effective operations in an environment involving two way face to face communications such as those required while stabilizing and reconstructing a nation The case of Korean reunification serves as an extreme scenario that nevertheless depicts the drastic need for improvements in the capabilities of modern PSYOP forces

Prospects from Korean Reunification David Coghlan, 2008 [An Alternative Scenario for the Reunification of Korea](#) Steve A. Fondacaro, 1997 This paper predicts an alternate scenario to Korean reunification to those currently being discussed in and out of South Korea Much of what has been written discusses the demise of the present North Korean government along a spectrum of turbulence from gradual decay to violent implosion The predicted results also vary from peaceful absorption by the South Korean government to a war of desperation scenario precipitated by the decaying Northern regime in a last ditch effort to retain power This paper explores a scenario where the two Koreas end up as secondary players in the future of the Korean peninsula The primary regional actor to emerge will be China As the ascendant regional power China will shape events on the Korean Peninsula to fit its own future vision of Northeast Asia It is further proposed that this Chinese vision will seek to maintain the peaceful division of North and South Korea in the short term 10 to 20 years following the demise of the present North Korean government China is seen in this scenario as moving unilaterally on the basis of long standing agreements with North Korea into North Korea as the government implodes It is in the Chinese interest to prevent the uncontrolled rise of a new potentially powerful reunified Korean regional competitor Additionally China will seek to minimize United States influence in the region For obvious historical military and economic reasons the Japanese desire to maintain the geopolitical and economic status quo will cause them to play a supporting role in the Chinese effort This move together with its predictable control of the Spratly Islands oil and natural gas reserves an already powerful military and rapidly growing economy will put China in a position to much more effectively influence the future of the region

Korean Unification Paul D. Rounsaville, 1997 *Preparing for Korean Unification* Jonathan D. Pollack, Chung Min Lee, 1999 This study examines four alternative scenarios that would result in the unification of the Korean peninsula The authors describe the defining characteristics of each scenario potential indicators that would predict specific outcomes some possible variations in paths to unification and some operational implications for the U S Army under different conditions and circumstances The four scenarios peaceful unification collapse and absorption unification through armed conflict and disequilibrium and external intervention highlight both the increasing vulnerabilities of the North Korean state and the substantial uncertainties that attach to each outcome and to the potential U S policy responses *PROSPECTS FROM KOREAN REUNIFICATION*.
