Public Relations and Participatory Culture Amber Hutchins, Natalie Tindall, 2016-03-10 While public relations practitioners have long focused on the relationship between organizations and their stakeholders there has never been a time when that relationship was so dominated by public participation The new model of multiple messages originating from multiple publics at varying levels of engagement is widely acknowledged but not widely explored in scholarly texts The established model of one way communication and message control no longer exists Social media and an increasingly participatory culture means that fans are taking a more active role in the production and co creation of messages communication and meaning These fans have significant power in the relationship dynamic between the message the communicator and the larger audience yet they have not been defined using current theory and discourse Our existing conceptions fail to identify these active and engaged publics let alone understand virtual communities who are highly motivated to communicate with organizations and brands This innovative and original research collection attempts to address this deficit by exploring these interactive engaged publics and open up the complexities of establishing and maintaining relationships in fan created communities

Reassessing the Relationship between Marketing and Public Relations Lisa Dühring, 2017-04-24 Lisa Dühring reconstructs the relationship between public relations and marketing research on a metatheoretical level She presents a concise systematization of the theoretical discourse in both disciplines since the beginning of the twentieth century by differentiating key phases of development and evaluating current research approaches This study argues for a stronger connection of both disciplines and a better profiling within the mother disciplines of communication and business studies by fostering critical and interpretative approaches This book is strongly recommended to everybody interested in the history and epistemology of marketing and public relations theory and the relationship between both fields The Strategic Communication Imperative

James Mahoney, 2021-12-30 This book proposes a model for directly aligning strategic communication with organisational business planning to enable effective management of mid to long term organisational issues It argues that current conceptualisations of strategic communication need to be extended to locate it more precisely within definitions of strategy and as an essential element of mid and long term business planning This approach re positions strategic issues communication in a professional practice dimension that has a specific focus on issues that do not immediately impact on an organisation's ability to achieve its day to day business goals Full of contemporary examples from business and including a thorough explanation of how the model can be applied in professional practice the book will prove illuminating reading for scholars students and professionals alike Pathways to Public Relations Burton St. John III, Margot Opdycke

Lamme, Jacquie L'Etang, 2014-04-24 Over the centuries scholars have studied how individuals institutions and groups have used various rhetorical stances to persuade others to pay attention to believe in and adopt a course of action The emergence of public relations as an identifiable and discrete occupation in the early 20th century led scholars to describe this new iteration of persuasion as a unique more systematized and technical form of wielding influence resulting in an overemphasis on practice frequently couched within an American historical context This volume responds to such approaches by expanding

the framework for understanding public relations history investigating broad conceptual questions concerning the ways in which public relations rose as a practice and a field within different cultures and countries at different times in history With its unique cultural and contextual emphasis Pathways to Public Relations shifts the paradigm of public relations history away from traditional methodologies and assumptions and provides a new and unique entry point into this complicated arena
