Burke, Paine, and the Rights of Man R. R. Fennessy, 2012-12-06 At the present day when there is renewed interest in the concept of human rights and in the application of this concept to the problems of government it may be instructive to review an eighteenth century dispute which was concerned precisely with these themes Nor should the investigation be any less interesting because the disputants were Edmund Burke and Thomas Paine both these men have also been the object of renewed attention and study in recent years Critical work on the biography and bibliography of Paine is being done by Professor Aldridge and Col Richard Gimbel respectively 2 while Burke is being well looked after not only by the able team of experts who under the leadership of Professor Copeland are engaged in producing the critical edition of his Correspondence but also by such individual scholars as D C Bryant C B Cone T H D Mahoney 3 P J Stanlis C Parkin F Canavan and A Cobban But though Burke and Paine are being studied separately little work appears to have been done on the relationship between them apart from an 4 essay by Professor Copeland published more than twelve years ago It is hoped that the present study while it does not claim to add anything to the facts about Burke and Paine already known to his 1 See Nehemiah Robinson

The Universal Declaration of Human Rights **America, Amerikkka** Rosemary Radford Ruether, 2014-12-05 America views itself as a nation inhabiting a promised land and enjoying a favoured relation with God This view of unique election has been coupled with racial exclusivism and the marginalization of non white citizens America Amerikkka traces the historical and ideological patterns behind America s sense of itself In its examination of America s chosenness the book ranges across the doctrine of the rights of man in the 18th and 19th centuries the role of America in the twentieth century as global policeman and the enforcement of neo colonial relations over the third world The volume argues for a vision of global relations between peoples based on justice and mutuality rather than hegemonic dominance

The Anarchist in the Library Siva Vaidhyanathan, 2005-05-11 From Napster to Total Information Awareness to flash mobs the debate over information technology in our lives has revolved around a single question How closely do we want cyberspace to resemble the real world Siva Vaidhyanathan enters this debate with a seminal insight While we ve been busy debating how to make cyberspace imitate the world the world has been busy imitating cyberspace More and more of our social political and religious activities are modeling themselves after the World Wide Web Vaidhyanathan tells us the key information structure of our time and the key import from cyberspace into the world is the peer to peer network Peer to peer networks have always existed but with the rise of electronic communication they are suddenly coming into their own And they are drawing the outlines of a battle for information that will determine much of the culture and politics of our century affecting everything from society to terrorism from religion to the latest social fads The Anarchist in the Library is a radically original look at how this battle defines one of the major fault lines of twenty first century civilization

Wages of Rebellion Chris Hedges, 2015-05-12 Revolutions come in waves and cycles We are again riding the crest of a revolutionary epic much like 1848 or 1917 from the

Arab Spring to movements against austerity in Greece to the Occupy movement In *Wages of Rebellion* Chris Hedges who has chronicled the malaise and sickness of a society in terminal moral decline in his books *Empire of Illusion* and *Death of the Liberal Class* investigates what social and psychological factors cause revolution rebellion and resistance Drawing on an ambitious overview of prominent philosophers historians and literary figures he shows not only the harbingers of a coming crisis but also the nascent seeds of rebellion Hedges message is clear popular uprisings in the United States and around the world are inevitable in the face of environmental destruction and wealth polarization Focusing on the stories of rebels from around the world and throughout history Hedges investigates what it takes to be a rebel in modern times Utilizing the work of Reinhold Niebuhr Hedges describes the motivation that guides the actions of rebels as sublime madness the state of passion that causes the rebel to engage in an unavailing fight against overwhelmingly powerful and oppressive forces For Hedges resistance is carried out not for its success but as a moral imperative that affirms life Those who rise up against the odds will be those endowed with this sublime madness From South African activists who dedicated their lives to ending apartheid to contemporary anti fracking protests in Alberta Canada to whistleblowers in pursuit of transparency *Wages of Rebellion* shows the cost of a life committed to speaking the truth and demanding justice Hedges has penned an indispensable guide to rebellion

English Constitutional Theory and the House of Lords 1556-1832 (Routledge Revivals) Corinne Comstock Weston, 2010-01-22 First published in 1965 this work studies the House of Lords and the various proposals for its reform abolition or limitation of its powers which have been made in the light of prevailing theories of the nature and characteristics of the English government The work also contains a history of the theory of mixed government that arose in Tudor England and lasted until well after the Reform Act of 1832 This history both illuminates the position of the House of Lords and also provides perspective for the study of Democracy in the movement for parliamentary reform One of the book's most original features is an extensive account of Charles I's Answer to the Nineteen Propositions out of which came the startling new theory of the constitution known as mixed monarchy

Coronavirus Criminals and Pandemic Profiteers John Nichols, 2022-01-25 A furious denunciation of America's coronavirus criminals Hundreds of thousands of deaths were caused not by the vicissitudes of nature but by the callous and opportunistic decisions of powerful people as revealed here by John Nichols On March 10 2020 president Donald Trump told a nation worried about a novel coronavirus We're prepared and we're doing a great job with it And it will go away Just stay calm It will go away It has since been estimated that had Trump simply taken the same steps as other G7 countries 40 percent fewer Americans would have died And it was not just the president His inner circle including Mike Pence and Jared Kushner downplayed the crisis and mishandled the response Cabinet members such as Betsy DeVos and Mike Pompeo undermined public safety at home and abroad to advance their agendas Senators Ron Johnson and Mitch McConnell governors Kristi Noem and Andrew Cuomo judges such as Wisconsin Supreme Court justice Rebecca Bradley all promulgated public policies that led to suffering and

death Meanwhile profiteer Pfizer and anti government propagandists such as Grover Norquist fed at the public trough while the billionaire Jeff Bezos added pandemic profits to a grotesquely bloated fortune John Nichols closes with a call for a version of the Pecora Commission which took aim at what Franklin Delano Roosevelt called the speculation reckless banking class antagonism and profiteering that stoked the Depression There must be accountability **Standard Catalog for High**

Human Rights Compliance in Europe Zoë Jay,2025-02-24 The European Court of Human Rights depends on the good faith cooperation of its members to implement judgement and maintain legitimacy but how this translates into compliance varies both across and within states This book presents an innovative framework for understanding how local cultures dynamically shape states ideas about what is and is not legitimate in international human rights regimes The book investigates compliance as a product of cultural politics Case studies from the United Kingdom Germany and Croatia reveal how states rely on local understanding of human rights and law to deal not only with compliance sticking points but also to evaluate the legitimacy of the European human rights system as a whole
