Public Values And Public Interest Counterbalancing Economic Individualism Public Management And Change:

Public Values and Public Interest Barry Bozeman, 2007-10-24 Economic individualism and market based values dominate today's policymaking and public management circles often at the expense of the common good. In his new book Barry Bozeman demonstrates the continuing need for public interest theory in government. Public Values and Public Interest offers a direct theoretical challenge to the utility of economic individualism, the prevailing political theory in the western world. The book's arguments are steeped in a practical and practicable theory that advances public interest as a viable and important measure in any analysis of policy or public administration. According to Bozeman, public interest theory offers a dynamic and flexible approach that easily adapts to changing situations and balances today's market-driven attitudes with the concepts of common good advocated by Aristotle, Saint Thomas Aquinas, John Locke, and John Dewey. In constructing the case for adopting a new governmental paradigm based on what he terms managing publicness, Bozeman demonstrates why economic indices alone fail to adequately value social choice in many cases. He explores the implications of privatization of a wide array of governmental services, among them Social Security, defense, prisons, and water supplies. Bozeman constructs analyses from both perspectives in an extended study of genetically modified crops to compare the policy outcomes using different core values and questions the public value of engaging in the practice solely for the sake of cheaper food. Thoughtful, challenging, and timely, Public Values and Public Interest shows how the quest for fairness can once again play a full part in public policy debates and public administration.

Public Value and Public Administration John M. Bryson, Barbara C. Crosby, Laura Bloomberg, 2015-08-18 Governments and nonprofits exist to create public value. Yet what does that mean in theory and practice? This new volume brings together key experts in the field to offer unique, wide-ranging answers. From the United States, Europe, and Australia, the contributors focus on the creation, meaning, measurement, and assessment of public value in a world where government, nonprofit organizations, business, and citizens all have roles in the public sphere. In so doing, they demonstrate the intimate link between ideas of public value and public values and the ways scholars theorize and measure them. They also add to ongoing debates over what public value might mean, the nature of the most important public values, and how we can practically apply these values. The collection concludes with an extensive research and practice agenda conceived to further the field and mainstream its ideas. Aimed at scholars, students, and stakeholders ranging from business and government to nonprofits and activist groups, Public Value and Public Administration is an essential blueprint for those interested in creating public value to advance the common good.

Multi-Sector Partnerships for the Public Good Samuel L. Brown, Richard Gregory Johnson, 2023-01-01 What is the way that societies improve and solve problems? What is the purpose of business in society? Is there a role for markets and business in issues of civic good, justice, equality, education, environment, health, or collective action? Current economic principles, which underpin our trust in markets, are not value neutral. Therefore, how we design market solutions to problems should be the focus of vigorous and open debate. Multi-

sector Partnership is a concept that has re focused us on the meaning of the goods and social practices we value as citizens in a global society Multi sector partners emerge in society to offer innovative approaches to dealing with pressing yet complex social economic and weather related 21st century challenges Multi sector partnerships loosely defined as activities with an embedded social purpose is about using skills from a range of sectors to craft innovative responses to address social problems It aims at social impact but does not exclude economic wealth creation Thus it is not limited to the non profit or social sectors but seeks to mobilize and align interests of diverse stakeholders in the social public and private sectors by creating non financial incentives for collective action Multi sector partnerships involve recognizing that social problems are potential opportunities for collaboration building on existing social networks harnessing market forces that combine and mobilize resources inciting positive change in various domains and designing solutions for sustainable development The purpose of this edited volume is to provide academic and practitioners with the essential conceptual frameworks and tools for creating successful Multi sector ventures initiatives programs or partnerships that seek to tackle global social issues and collective action problems

Implementing Innovation Toddi A. Steelman,2010-04-15 Over the past three decades governments at the local state and federal levels have undertaken a wide range of bold innovations often in partnership with nongovernmental organizations and communities to try to address their environmental and natural resource management tasks Many of these efforts have failed Innovations by definition are transitory How then can we establish new practices that endure Toddi A Steelman argues that the key to successful and long lasting innovation must be a realistic understanding of the challenges that face it She examines three case studies land management in Colorado watershed management in West Virginia and timber management in New Mexico and reveals specific patterns of implementation success and failure Steelman challenges conventional wisdom about the role of individual entrepreneurs in innovative practice She highlights the institutional obstacles that impede innovation and its longer term implementation while offering practical insight in how enduring change might be achieved

Public Value Co-Creation Alessandro Sancino,2022-08-08 Public Value Co Creation A Multi Actor Multi Sector Perspective addresses a fundamental gap in the scholarly field of Public Management relating to the advice and resources available on what public managers can and or should do to co create public value

Challenges to Public Value Creation Brian J. Cook,2024-03-27 This powerful collection shows that public value has come of age Its reach has extended far beyond the Anglosphere from which it has emerged And it provides a prism for strategic thinking about how governments are to deal with the grittiness of the contexts and challenge

they currently face This must read volume sits at the cutting edge of these important developments Paul t Hart Professor of Public Administration Utrecht University The Netherlands Challenges to Public Value Creation is a wonderful addition to the growing literature on public value creation John M Bryson McKnight Presidential Professor Emeritus University of Minnesota USA The purpose of government is to create public value While this has become an increasingly accepted refrain in public policy administration and management numerous questions remain about where when why how and by whom public value is created With everything from philosophical and conceptual arguments to empirical analyses and cases the contributors to this noteworthy volume offer new ideas reveal important insights suggest exciting directions for research and practice and ultimately give more substance and shape to the idea of public value creation Tina Nabatchi Director Program for the Advancement of Research on Conflict Collaboration Syracuse University USA This volume examines fundamental questions about the public value of public decisions More specifically it seeks to assess whether all public decisions create public value if it is possible to know what value for the public as a whole a government decision will create and how government officials can justify their decisions in terms of public value Leading experts bring a diverse array of perspectives on the normative epistemological and processual challenges to identifying describing measuring and evaluating the public value claims that public officials often articulate in defending their decisions and the results that citizens often seek The book will appeal to scholars and students of public policy and public administration Brian J Cook is Emeritus Professor of Public Administration and Policy at Virginia Tech USA

Ethical Public Leadership Stephen M. King, 2023-09-29 Dozens of books are published each year on leadership but as pundits scholars philosophers and public intellectuals note what is written is too often shallow and facile oriented toward quick fixes for performance enhancement or internal organizational and personnel development Drawing from a diverse range of literature including history philosophy public administration leadership religion and spirituality this book fills an important gap exploring what it means to be an ethical and moral leader It takes a deep dive into the many challenges of leadership examining the continuing contrast between bureaucracy and democracy the unique ethical and moral characteristics of nonprofit and faith based organizations and the globalization of organizations and institutions Throughout the book author Stephen M King develops a more holistic and interdisciplinary understanding of ethical and moral leadership required for more thoughtful theoretical and empirical research He points students of leadership to the time honored values of ethics and morality reestablishes the ethical balance between bureaucracy and democracy and helps reorient the values purpose of public nonprofit and global institutions providing hope of a better future for leadership *Ethical Public Leadership* is required reading for students of public administration and nonprofit management as well as for practicing public servants and nonprofit sector employees at all levels

Organizational Learning at NASA Julianne G. Mahler, 2009-03-27 Just after 9 00 a m on February 1 2003 the space shuttle Columbia broke apart and was lost over Texas This tragic event led as the Challenger accident had 17 years earlier to an intensive government investigation of the

technological and organizational causes of the accident The investigation found chilling similarities between the two accidents leading the Columbia Accident Investigation Board to conclude that NASA failed to learn from its earlier tragedy Despite the frequency with which organizations are encouraged to adopt learning practices organizational learning especially in public organizations is not well understood and deserves to be studied in more detail This book fills that gap with a thorough examination of NASA's loss of the two shuttles After offering an account of the processes that constitute organizational learning Julianne G Mahler focuses on what NASA did to address problems revealed by Challenger and its uneven efforts to institutionalize its own findings She also suggests factors overlooked by both accident commissions and proposes broadly applicable hypotheses about learning in public organizations
