Publishing Without Borders:

Books Without Borders, Volume 1 Robert Fraser, Mary Hammond, 2008-07-31 Where does the book belong Does it enshrine the soul of a nation or is it a means by which nations talk to one another sharing ideas technologies texts This book the first in a two volume set of original essays responds to these questions with archive based case studies of print culture in a number of countries around the world *Books Without Borders in Enlightenment Europe* Jeffrey Freedman, 2012-06-28 Though the field of book history has long been divided into discrete national histories books have seldom been as respectful of national borders as the historians who study them least of all in the age of Enlightenment when French books reached readers throughout Europe In this erudite and engagingly written study Jeffrey Freedman examines one of the most important axes of the transnational book trade in Enlightenment Europe the circulation of French books between France and the German speaking lands Focusing on the critical role of book dealers as cultural intermediaries he follows French books through each stage of their journey from the French language printing shops where they were produced to the wholesale book fairs in Leipzig to retail book shops at locations scattered widely throughout Germany At some of those locations authorities reacted with alarm to the spread of French books burning works of the radical French Enlightenment and punishing the booksellers who sold them But officials had little power to curtail their circulation the political fragmentation of the German lands made it virtually impossible to police the book trade Largely unimpeded by censorship French books circulated more freely in Germany than in the absolutist monarchy of France In comparison the flow of German books into the French market was negligible an asymmetry that corresponded to the hierarchy of languages in Enlightenment Europe But publishers in Switzerland produced French translations of German books By means of title changes creative editing and mendacious advertising the Swiss publishers adapted works of the German Enlightenment for an audience of French readers that stretched from Dublin to Moscow An innovative contribution to both the history of the book and the transnational study of the Enlightenment Freedman s work tells a story of crucial importance to understanding the circulation of texts in an age in which the concept of World Literature had not yet been invented but the phenomenon already existed *Books Without Borders, Volume 2* R. Fraser, M. Hammond, 2008-07-10 This volume focuses on the publisher s series as a cultural formation a material artifact and component of cultural hierarchies Contributors engage with archival research cultural theory literary and bibliometric analysis amongst a range of other approaches to contextualize the publisher s series in terms of its cultural and economic work **Rebels without Borders** Idean Salehyan, 2011-07-07 Rebellion insurgency civil war conflict within a society is customarily treated as a matter of domestic politics and analysts generally focus their attention on local causes Yet fighting between governments and opposition groups is rarely confined to the domestic arena Internal wars often spill across national boundaries rebel organizations frequently find sanctuaries in neighboring countries and insurgencies give rise to disputes between states In *Rebels without Borders* which will appeal to students of international and civil war and those

developing policies to contain the regional diffusion of conflict Idean Salehyan examines transnational rebel organizations in civil conflicts utilizing cross national datasets as well as in depth case studies He shows how external Contra bases in Honduras and Costa Rica facilitated the Nicaraguan civil war and how the Rwandan civil war spilled over into the Democratic Republic of the Congo fostering a regional war He also looks at other cross border insurgencies such as those of the Kurdish PKK and Taliban fighters in Pakistan Salehyan reveals that external sanctuaries feature in the political history of more than half of the world s armed insurgencies since 1945 and are also important in fostering state to state conflicts Rebels who are unable to challenge the state on its own turf look for mobilization opportunities abroad Neighboring states that are too weak to prevent rebel access states that wish to foster instability in their rivals and large refugee diasporas provide important opportunities for insurgent groups to establish external bases Such sanctuaries complicate intelligence gathering counterinsurgency operations and efforts at peacemaking States that host rebels intrude into negotiations between governments and opposition movements and can block progress toward peace when they pursue their own agendas

Chinese American Literature without Borders King-Kok Cheung, 2017-02-18 This book bridges comparative literature and American studies by using an intercultural and bilingual approach to Chinese American literature King Kok Cheung launches a new transnational exchange by examining both Chinese and Chinese American writers Part 1 presents alternative forms of masculinity that transcend conventional associations of valor with aggression It examines gender refashioning in light of the Chinese dyadic ideal of wen wu verbal arts and martial arts while redefining both in the process Part 2 highlights the writers formal innovations by presenting alternative autobiography theory metafiction and translation In doing so Cheung puts in relief the literary experiments of the writers who interweave hybrid poetics with two pronged geopolitical critiques The writers examined provide a reflexive lens through which transpacific audiences are beckoned to view the other country and to look homeward without blinders

Ontology Without Borders Jody Azzouni, 2017-07-20 Our experience of objects and consequently our theorizing about

them is very rich We perceive objects as possessing individuation conditions They appear to have boundaries in space and time for example and they appear to move independently of a background of other objects or a landscape In *Ontology Without Boundaries* Jody Azzouni undertakes an analysis of our concept of object and shows what about that notion is truly due to the world and what about it is a projection onto the world of our senses and thinking Location and individuation conditions are our product there is no echo of them in the world Features the ways that objects seem to be aren't projections Azzouni shows how the resulting austere metaphysics tames a host of ancient philosophical problems about constitution Ship of Theseus Sorities as well as contemporary puzzles about reductionism In addition it's shown that the same sorts of individuation conditions for properties which philosophers use to distinguish between various kinds of odd abstracta universals tropes and so on are also projections Accompanying our notion of an object is a background logic that makes cogent ontological debate about anything from Platonic objects to Bigfoot Contemporary views about this background logic quantifier variance make ontological debate incoherent Azzouni shows how a neutral interpretation of quantifiers and quantifier domains makes sense of both philosophical and pre philosophical ontological debates Azzouni also shows how the same apparatus makes sense of our speaking about a host of items Mickey Mouse unicorns Martians that nearly all of us deny exist It's allowed by what Azzouni shows about the background logic of our ontological debates as well as the semantics of the language of those debates that we can disagree over the existence of things like unicorns without that background logic and semantics forcing ontological commitments onto speakers that they don't have
