Water and the Environmental History of Modern India Velayutham Saravanan,2020-01-23 This important new study investigates the competing demand for water in the Bhavani and Noyyal River basins of south India from the early 19th century to the early 21st century from a historical perspective In doing so the book addresses several important questions Did policy makers visualise the future demand while diverting water from distant places or other basins Was efficient use ensured when the water was diverted or was it diverted in a manner that resulted in pollution and serious damage to the entire river basin Were natural flows taken care of in order to preserve the ecology and environment What were the factors that aggravated the competing demand for water and what were the consequences for the future In the context of the current discourse on the competing demands for water this book takes the debate forward expanding the horizon of environmental history in the process Until now agriculture industry and domestic water supply and their consequences for ecology the environment and livelihoods have been given scant attention Velayutham Saravanan s comprehensive account of both the colonial and post colonial periods corrects this shortcoming in the field s literature and gives a holistic understanding of the problem and its full historical roots

Women Architects in India Mary N. Woods,2016-10-04 As the first inclusive study of how women have shaped the modern Indian built environment from the independence struggle until today this book reveals a history that is largely unknown not only in the West but also in India Educated in the 1930s and 1940s the very first women architects designed everything from factories to museums in the post independence period The generations that followed are now responsible for metro systems shopping malls corporate headquarters and IT campuses for a global India But they also design schools cultural centers religious pilgrimage hotels and wildlife sanctuaries Pioneers in conserving historic buildings these women also sustain and resurrect traditional crafts and materials empower rural and marginalized communities and create ecologically sustainable architectures for India Today although women make up a majority in India s ever increasing schools of architecture it is still not easy for them like their Western sisters to find their place in the profession Recounting the work and lives of Indian women as not only architects but also builders and clients opens a new window onto the complexities of feminism modernism and design practice in India and beyond Set in the design centers of Mumbai and Delhi this book is also one of the first histories of architectural education and practice in two very different cities that are now global centers The diversity of practices represented here helps us to imagine other ways to create and build apart from starchitecture And how these women negotiate tradition and modernity at work and at home is crucial for

understanding gender and modern architecture in a more global and less Eurocentric context In a country where female emancipation was important for narratives of the independence movement and the new nation state feminism was nonetheless eschewed as divisive and damaging to the nationalist cause Class caste tradition and family restricted but also created opportunities for the very first women architects in India just as they do now for the growing number of young women professionals today *Building Bridges* Sachidanand Joshi,Vaibhav Dange,2022 *Building Bridges* is the inspiring true story of Rudrapratab and his team of engineers whose dedication and talent lead to the ideation and development of India s first bridge management system Witnessing early on in life the tragic and wasteful loss of lives that bridge collapses cause sparks in Rudrapratab a burning passion for bridge safety He devotes his life to creating a comprehensive state of the art digitised system that can inspect and repair bridges as well as offer timely interventions to prolong the lives of the structures across the length and breadth of the country Along with associate Ajit Rudrapratab builds an able team of engineers whose meticulous research forms the basis of the beta inventory module of the Indian Bridge Management System Rudra s journey however is fraught with bureaucratic hurdles When a reticent administration repeatedly turns down his proposals for a bridge management system he nearly gives up on his dream before Minister Gadkari s office steps up to the plate This eye opening book looks back on the bumpy yet rewarding journey of a bunch of tenacious engineers who aspire to create a modern India with the most advanced bridge surveillance and management system and envision a future where no life would ever be lost again because of faulty bridges **Vārshika Riportā** India.
