**Rights of Passage** Nicholas Blomley, 2010-10-18 Although a powerful form of governance pedestrianism tends to be obscured by grander and more visible forms of urban regulation Routledge Handbook of Law and Theory Andreas Philippopoulos-Mihalopoulos, 2018-08-06 This handbook sets out an innovative approach to the theory of law reconceptualising it in a material embodied socially contextualised and politically radical way The book consists of original contributions authored by prominent academics all of whom provide a valuable overview of legal theory as a discipline The book contains five sections Spatiotemporal Sense Body Text Matter Through this structure the handbook brings the law into active discussion with other disciplines as well as supra disciplinary debates on the areas of spatiality temporality materiality corporeality and sensorial studies capturing the most exciting developments in current legal theory and anticipating future research in the area The handbook is essential reading for scholars and students of jurisprudence sociology of law critical legal studies socio legal theory and interdisciplinary legal studies as well as those people from other disciplines interested in the way the law converses with interdisciplinarity Chapter 12 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

**Chronotopes of Law** Mariana Valverde, 2015-01-09 This book develops a new framework for analyzing the spatio temporal workings of law and other forms of governance Chronotopes of Law argues that studies of law and governance can be reinvigorated by drawing on a bundle of quite heterogeneous analytical tools that do not have a single provenance or a single political or normative aim but that work well in combination Analyses of legal temporality carried out by anthropologists and studies of law and space undertaken by geographers and legal scholars have proliferated in recent years but these research traditions have remained largely separate By adapting notions such as intertextuality dialogism and the chronotope from Mikhail Bakhtin notions designed specifically to synthesize considerations of space and time in a framework that is open ended interactive and dynamic Mariana Valverde develops an anti metaphysical theory and method for legal studies This approach will be useful both to theorists and to researchers seeking to illuminate the actual workings of law and other forms of governance Indeed a key aim of the book is to break down the institutional and disciplinary barriers that prevent theorists from learning from empirical studies and viceversa Written by one of the foremost sociolegal scholars writing today this theoretically innovative work constitutes a major contribution to contemporary studies in law and society

*The Right to Housing* Jessie Hohmann, 2013-03-01 A human right to housing represents the law's most direct and overt protection of housing and home Unlike other human rights through which the home incidentally receives protection and attention the right to housing raises housing itself to the position of primary importance However the meaning content scope and even existence of a right to housing raise vexed questions Drawing on insights from disciplines including law anthropology political theory philosophy and geography this book is both a contribution to the state of knowledge on the

right to housing and an entry into the broader human rights debate It addresses profound questions on the role of human rights in belonging and citizenship the formation of identity the perpetuation of forms of social organisation and ultimately of the relationship between the individual and the state The book addresses the legal theoretical and conceptual issues providing a deep analysis of the right to housing within and beyond human rights law Structured in three parts the book outlines the right to housing in international law and in key national legal systems examines the most important concepts of housing space privacy and identity and finally looks at the potential of the right to alleviate human misery marginalisation and deprivation The book represents a major contribution to the scholarship on an under studied and ill defined right In terms of content it provides a much needed exploration of the right to housing In approach it offers a new framework for argument within which the right to housing as well as other under theorised and contested rights can be reconsidered reconnecting human rights with the social conditions of their violation and hence with the reasons for their existence

law moves across different colonial and contemporary spaces this book reveals there is a problem with common law's place. Primarily set in the postcolonial context of Australia although ranging beyond this nationalised topography both spatially and temporally this book argues movement is fundamental to the very terms of common law's existence. How then might we move well? Explored through examples of walking and burial this book responds to the challenge of how to live with a contemporary form of colonial legal inheritance by arguing we must take seriously the challenge of living with law and think more carefully about its spatial productions and place making activities. Unsettling place this book returns the question of movement to jurisprudence.

Legal Geography Tayanah O'Donnell, Daniel F. Robinson, Josephine Gillespie, 2019-12-06. This book is the first legal geography book to explicitly engage in method. It complements this by also bringing together different perspectives on the emerging school of legal geography. It explores human environment interactions and showcases distinct environmental legal geography scholarship. Legal Geography Perspectives and Methods is an innovative book concerned with a new relational and material way of examining our legal spatial world. With chapters examining natural resource management, Indigenous knowledge and political ecology scholarship the text introduces legal geography's modes of analysis and critique. The book explores topics such as Indigenous environmental rights, the impacts of extractive industries, mediation of climate change, food, animal and plant patents, fossil fuels, mining and coastal environments based on empirical, jurisdictional and methodological insights from Australia, New Zealand and the Asia Pacific to demonstrate how space and place are invoked in legal processes and contestations and the methods that may be employed to explore these processes and contestations. This book examines the role of legal geographies in the 21st century beyond the simple law in action and it will thus appeal to students of socio legal studies, human geography, environmental studies, environmental policy as well as politics and international relations.
