Rijksmuseumagenda 2016:

Collections Management as Critical Museum Practice Cara Krmpotich, Alice Stevenson, 2024-07-22 There is a common misconception that collections management in museums is a set of rote procedures or technical practices that follow universal standards of best practice This volume recognises collections management as a political critical and social project involving considerable intellectual labour that often goes unacknowledged within institutions and in the fields of museum and heritage studies Collections Management as Critical Museum Practice brings into focus the knowledges value systems ethics and workplace pragmatics that are foundational for this work Rather than engaging solely with cultural modifications such as Indigenous care practices the book presents local knowledge of place and material which is relevant to how collections are managed and cared for worldwide Through discussion of varied collection types management activities and professional roles contributors develop a contextualised reflexive practice for how core collections management standards are conceptualised negotiated and enacted Chapters span national museums in Brazil and Uganda to community led heritage work in Malaysia and Canada they explore complexities of numbering digitisation and description alongside the realities of climate change global pandemics and natural disasters The book offers a new definition of collections management travelling from what is done to care for collections to what is done to care for collections and their users Rather than use being an end goal it emerges as a starting point to rethink collections work Museum and Archive on the Move Oliver Grau, 2017-09-11 The digital revolution fundamentally changed how cultural heritage is created documented analyzed and preserved The book focuses on this transformation s impact How must museums and archives meet the challenges of digitally generated cultures and how does the digital revolution influence traditional object collection research and education How do digital technologies and digital art and culture affect our interaction with images Leading international experts from various disciplines break new ground Pioneering interdisciplinary research results collected in this book are relevant to education curators and archivists in the arts and culture sector and in the digital humanities *Women in the Museum* Joan H. Baldwin, Anne W. Ackerson, 2017-06-26 The number of women working in museum settings has grown exponentially since the start of the twentieth century Women in the Museum explores the professional lives of the sector s female workforce today and examines the challenges they face working in what was until recently a male dominated field Drawing on testimony gathered from surveys focus groups and interviews with female museum professionals the book examines the nature of gender bias in the profession as well as women s varied responses to it In doing so it clarifies how women s work in museums differs from men s and reveals the entrenched nature of gender bias in the museum workplace Offering a clear argument as to why museums must create foster and protect an equitable playing field the authors incorporate a gender equity agenda for individuals institutions graduate programs and professional associations Written by experienced museum professionals Women in the Museum is the first book to examine the topic in depth It is useful reading for students and academics in the fields of

museum studies and gender studies as well as museum professionals and gender equality advocates *Manual of Digital Museum Planning* Ali Hossaini, Ngaire Blankenberg, 2017-03-27 The Manual of Digital Museum Planning is a comprehensive guide to digital planning development and operations for museum professionals and students of museums studies and arts administration In the tradition of Lord Cultural Resource s renowned manuals this book gives practical advice on how digital can enhance and improve all aspects of the museum With chapters written by experienced professionals working at leading institutions such as the British Museum the Metropolitan Museum of Art the Indianapolis Museum of Art Bristol Culture the Canadian Museum for Human Rights and others The Manual of Digital Museum Planning is an easy to understand step by step guide for anyone planning a new museum a museum expansion or a new project in the Digital Age Part 1 explains how digital technologies are transforming museums and their value proposition Part 2 explores how adopting a user centric omnichannel approach creates new relationships between museums and communities Part 3 offers a guide to integrating digital into the workflow of museums from data analytics to user experience design to project management Part 4 identifies the business models infrastructure and skills and competencies for the digital museum Each chapter culminates in summary takeaways for easy recall and key words are defined throughout A glossary and reference list are also included as an accessible resources for readers Museum Activism Robert R. Janes, Richard Sandell, 2019-01-10

Only a decade ago the notion that museums galleries and heritage organisations might engage in activist practice with explicit intent to act upon inequalities injustices and environmental crises was met with scepticism and often derision Seeking to purposefully bring about social change was viewed by many within and beyond the museum community as inappropriately political and antithetical to fundamental professional values Today although the idea remains controversial the way we think about the roles and responsibilities of museums as knowledge based social institutions is changing Museum Activism examines the increasing significance of this activist trend in thinking and practice At this crucial time in the evolution of museum thinking and practice this ground breaking volume brings together more than fifty contributors working across six continents to explore analyse and critically reflect upon the museum s relationship to activism Including contributions from practitioners artists activists and researchers this wide ranging examination of new and divergent expressions of the inherent power of museums as forces for good and as activists in civil society aims to encourage further experimentation and enrich the debate in this nascent and uncertain field of museum practice Museum Activism elucidates the largely untapped potential for museums as key intellectual and civic resources to address inequalities injustice and environmental challenges This makes the book essential reading for scholars and students of museum and heritage studies gallery studies arts and heritage management and politics It will be a source of inspiration to museum practitioners and museum leaders around the globe

Museums and Racism Kylie Message, 2018-05-15 Racism is a hot topic in museums today as well as an urgent social issue Focused on the broad field of multicultural policy Museums and Racism examines how the Immigration Museum in

Melbourne Australia has responded to political culture and public debate around racism Analysis focuses on the conceptualization of the Immigration Museum in the mid 1990s and on the most recent permanent exhibition to be opened there in 2011 which coincided with the publication of a new multicultural policy for Australia The opening of the National Museum of Australia in Canberra in the intervening period is also examined in some detail as a comparative case study to provide a sense of the broader national social and political context Message argues that each of the three episodes demonstrates the close relationship between museum and exhibition development on the one hand and policy politics and public opinion on the other hand Including a discussion of examples from the United States and other relevant contexts Museums and Racism is key reading for students and scholars of museum studies and cultural studies around the world The book should also be of great interest to museum practitioners and policymakers in the area of multiculturalism

Latin American Art at The Museum of Modern Art Miriam M. Basilio Gaztambide, 2025-06-13 This book sheds light on an as yet unstudied aspect of The Museum of Modern Art s MoMA preeminent role in establishing the definition of the problematic term Latin American art in the United States from the 1930s to the present through its collection displays In examining the shifting categorization of Latin American works according to stylistic and geographic taxonomies we gain a greater understanding of the organization of the Museum s collections as a whole during the 1940s and 1950s This book is the first to document these institutional precedents crucial for the understanding of the articulation of a Modernist canon and its contested legacy today The MoMA is widely recognized as the preeminent institution that defined 20th century art through its collection shaping our understandings of the history of art with its hierarchies and exclusions as they sediment over time MoMA s holdings of art from Latin America shed light on a key period when the stylistic categories that have since come to be accepted by many today as the Modernist canon developed MoMA s collection displays suggest ways in which artists from areas of the world formerly excluded can be incorporated within today s increasingly global museums MoMA s approach may be compared to initiatives adopted by several museums since the 2000s creating geographically defined curatorial positions as a way to redress gaps in collecting art from Latin America and other areas of the world In this book author Miriam M Basilio Gaztambide offers a closer study of the history of collection displays as a means to understand canon formation in modern art museums This work will be of interest to those researching Latin American American modern and contemporary art and curatorial and museum studies

The Othering Museum Carrie Westwater, 2024-05-23 The term othering refers to a persistent Us and Them dynamic between museums and their participating public To reframe this historically paternalistic subject positioning over the last decade or so many museums have made firm attempts to address this by attempting to move from being providers of engagements to facilitating access to cultural right by embedding co curatorial techniques and participation Through the analysis of three co curated participatory case studies this book examines how power performs in co curatorial museum practice It discusses how it is not just how the participatory process is enacted that

is necessary to create this shift to a more socially just profile but systemic pressures of vulnerability and responsibility found in the political economy of the museum and its participants This book will chart how this dynamic performs in museums when working with different groups of people such as volunteers community participants and professional artists presented with differing levels of co curatorial decision making The book further investigates whether performances of power are relational to who the participants are how the processes of participation are constructed and where the participation takes place what language is used when conducting these relationships and what the funded institutional responsibilities do to the co curators the community and museum staff when traditional co curation and co curation in transition to non selective curation is applied Grounding this discussion is the development of this test method of non selective curation which further illuminates some of these challenges and aims to successfully mitigate them through a radically open and inclusive approach to co curation
