Second Sex Marcia C. Inhorn, Maruska la Cour Mosegaard, Tine Tjørnhøj-Thomsen, Helene Goldberg, 2009-08-01 Extensive social science research particularly by anthropologists has explored women's reproductive lives, their use of reproductive technologies and their experiences as mothers and nurturers of children. Meanwhile few if any volumes have explored men's reproductive concerns or contributions to women's reproductive health. Men are clearly viewed as the second sex in reproduction. This volume argues that the marginalization of men is an oversight of considerable proportions. It sheds new light on male reproduction from a cross cultural global perspective focusing not only upon men in Europe and America but also those in the Middle East, Asia and Latin America. Both heterosexual and homosexual married and unmarried men are featured in this volume which assesses concerns ranging from masculinity and sexuality to childbirth and fatherhood.

Occupational Science Gail E. Whiteford, Clare Hocking, 2012-02-13 Occupational Science Society Inclusion Participation is the must have resource for occupational therapists, occupational scientists, students and researchers. The book begins with a comprehensive review of the current literature and the knowledge generated to date. Reasons for the field's limited impact are proposed including its focus on individuals rather than groups and communities, its psychological view of occupation and its narrow focus on socially approved occupations. Global realities such as poverty, anti social behaviour and ageing populations are discussed and implications for action are considered. The second section of the book comprises a series of chapters that address the philosophical, theoretical and scientific bases that underpin and inform everyday decision making in occupational therapy practice. This is followed by a section on methodological and structural considerations. The concluding chapter offers a critical reflection on methods, strategies, values and relationships for the future to achieve a relevant science that makes a difference to current occupational realities. Written by an internationally renowned team of contributors, this book offers a truly comprehensive critique of the field. Features: Internationally renowned Editors and contributors. First comprehensive text on occupational science. Fully up to date with the latest thinking and research. Links theory to practice.

Vietnamese Migrants in Russia Lan Anh Hoang, 2020-07-02 Drawing on ethnographic research conducted at Moscow's wholesale markets from 2013 to 2016, this book provides original insights into how uncertainty shapes social practice, identity and belonging in the context of irregular migration from Vietnam to Russia. The uncertainties examined here are not just social, economic and political but also psychological and moral. The study speaks to various debates in migration and mobility studies, particularly those focused on brokerage networks, the political economy of sexuality and social belonging, deepening our knowledge of how the core social values and cultural logics that underpin Vietnamese personhood are challenged and reconstituted by the ethos of the market economy. This book sheds important light on processes of mobility and social change in post socialist societies that continue to grapple with yawning chasms between old and new ways of life, the local and the global, policy and practice, and obsolete governance techniques and rapidly changing socio economic realities. *Texas Health Atlas* Lawrence E. Estaville, Kristine Egan, Abel Galaviz, 2012-03-19 With almost two hundred pages of original

The End of Physiotherapy David A. Nicholls, 2017-07-31 Physiotherapy is arriving at a critical point in its history Since World War I physiotherapy has been one of the largest allied health professions and the established provider of orthodox physical rehabilitation But ageing populations of increasingly chronically ill people a growing scepticism towards biomedicine and the changing economy of healthcare threaten physiotherapy's long held status Paradoxically physiotherapy's affinity for treating the body as machine has resulted in an almost complete inability to identify the roots of the profession's present problems or define possible ways forward Physiotherapists need to engage in critically informed theoretical discussion about the profession's past present and future to explore their practice from economic philosophical political and sociological perspectives The End of Physiotherapy aims to explain how physiotherapy has arrived at this critical point in its history and to point to a new future for the profession The book draws on critical analyses of the historical and social conditions that have made present day physiotherapy possible Nicholls examines some of the key discourses that have had a positive impact on the profession in the past but now threaten to derail it This book makes it possible for physiotherapists to think otherwise about their profession and their day to day practice It will be essential reading for scholars and students of physiotherapy interprofessional and community rehabilitation as well as appealing to those working in medical sociology the medical humanities medical history and health care policy
