Right Child Be Well Born:

The Right to be Well-born National Institute of Child Health and Human Development (U.S.),1975 **The Right to be Well Born** William Cole,1976 The Battle for Birth Control Jessica L. Furgerson,2022-03-29 The Battle for Birth Control delves into the complex rhetorical history of the American birth control movement in its formative years In just four decades advocates under the strategic guidance of Margaret Sanger transitioned the fight for contraception from fringe radical movement to a respectable mainstream cause endorsed by powerful professionals and politicians alike Eschewing their early ideological commitments to obtain widespread acceptance birth controllers adopted a strategy of political accommodation characterized by deferential rhetoric and careful posturing This strategy secured significant victories for the movement but at what cost Informed by a deep commitment to reproductive justice The Battle for Birth Control traces the duplicity of the movement s early rhetoric and argues that their accommodationist strategy yielded increased contraceptive access solely because of their willingness to endorse the neoliberal regime of reproductive control largely responsible for the current threats to reproductive autonomy in the 21st century *Mothers and Daughters in Nineteenth-Century America* Nancy M. Theriot,2021-05-11 The feminine script of early nineteenth century centered on women s role as patient long suffering mothers By mid century however their daughters faced a world very different in social and economic options and in the physical experiences surrounding their bodies In this groundbreaking study Nancy Theriot turns to social and medical history developmental psychology and feminist theory to explain the fundamental shift in women s concepts of femininity and gender identity during the course of the century from an ideal suffering womanhood to emphasis on female control of physical self Theriot s first chapter proposes a methodological shift that expands the interdisciplinary horizons of women s history She argues that social psychological theories recent work in literary criticism and new philosophical work on subjectivities can provide helpful lenses for viewing mothers and children and for connecting socioeconomic change and ideological change She recommends that women s historians take bolder steps to historicize the female body by making use of the theoretical insights of feminist philosophers literary critics and anthropologists Within this methodological perspective Theriot reads medical texts and woman authored advice literature and autobiographies She relates the early nineteenth century notion of true womanhood to the socioeconomic and somatic realities of middle class women s lives particularly to their experience of the new male obstetrics The generation of women born early in the century in a close mother daughter world taught their daughters the feminine script by word and action Their daughters however the first generation to benefit greatly from professional medicine had less reason than their mothers to associate womanhood with pain and suffering The new concept of femininity they created incorporated maternal teaching but altered it to make meaningful their own very different experience This provocative study applies interdisciplinary methodology to new and long standing questions in women s history and invites women s historians to explore alternative explanatory frameworks *Home Making Around the World*
