simple question like Are you a bachelor or unmarried instead of answering both if he is so the candidate said I am a bachelor Many students fear maths Once you understand the basic formulas and elementary theorems mathematics is one of the most interesting subjects Studying math is different from other subjects as study is of two types Active and Passive Mathematics is an active study Whenever you are bored or feel sleepy engage in mathematics Unlike other subjects each step in maths is built on the previous lesson For example unless you are well versed with algebra you don't understand logarithms Irrespective of whether you are a 5th standard student or a Post graduate in Mathematics this book suits you Solving puzzles in this book reduces over confidence and develops wisdom It quickens reflex actions and eases tension Here are 300 puzzles Give one puzzle every day and ask your student or child to work on it Some of these questions test the capacity to hold your nerve under pressure Don't feel dismayed even if you are not able to answer some of them Optimism knows what the tips are but success knows where the pits are Know the pits first This book shows your deficiencies and encourages locating your sphere of weakness Tease your friends with these questions Request your parents to ask you these riddles and win a bet for correct answer And finally Many of these puzzles are from internet and are not my own I modified many of them to nativity included additional explanations for complicated questions and added some of my own My intention is to pool all varieties of puzzles categorise them into groups and present them to the students I also included few cine artists and cricketers names to make it more interesting I thank Ms Prasanna Vanamala Uday Srinivasula for assisting me to finalise this book Author
