River Of Shadows Eadweard Muybridge And The Technological Wild West:

River of Shadows Rebecca Solnit, 2004-03-02 A New York Times Notable Book Winner of the National Book Critics Circle Award for Criticism The Mark Lynton History Prize and the Sally Hacker Prize for the History of Technology A panoramic vision of cultural change The New York Times Through the story of the pioneering photographer Eadweard Muybridge the author of *Orwell's Roses* explores what it was about California in the late 19th century that enabled it to become such a center of technological and cultural innovation The world as we know it today began in California in the late 1800s and Eadweard Muybridge had a lot to do with it This striking assertion is at the heart of Rebecca Solnit's new book which weaves together biography history and fascinating insights into art and technology to create a boldly original portrait of America on the threshold of modernity The story of Muybridge who in 1872 succeeded in capturing high speed motion photographically becomes a lens for a larger story about the acceleration and industrialization of everyday life Solnit shows how the peculiar freedoms and opportunities of post Civil War California led directly to the two industries Hollywood and Silicon Valley that have most powerfully defined contemporary society

Stereoscopic Cinema and the Origins of 3-D Film, 1838-1952 Ray Zone, 2014-04-23 From stereoview cards to large format IMAX films 3 D technology's heightened realism and powerful visual allure have held audiences captive for over a century and a half The technology known as stereoscopy creates an illusion of depth by presenting two slightly different images to the eye in print or on screen The advent of stereoscopic film technology excited both filmmakers and audiences as a means of replicating all of the sounds colors movement and dimensionality of life and nature for the first time The origins of 3 D film are often linked with a proliferation of stereoscopic films in the 1950s By the time films like *Man in the Dark* and *House of Wax* was attracting large crowds however the technology behind this form of filmmaking was already over a century old *Stereoscopic Cinema and the Origins of 3 D Film 1838 1952* examines this novelty period of stereoscopic film charting its progression from Charles Wheatstone's 1938 discovery of 3 D to the 1952 release of Arch Oboler's innovative film *Bwana Devil* Stereoscopic specialist Ray Zone argues that the development of stereoscopic film can best be understood through a historical analysis of the technology rather than of its inventors Zone examines the products used to create stereoscopic images noting such milestones as David Brewster's and Oliver Wendell Holmes's work

with stereoscopes the use of polarizing image selection and the success of twin strip 3 D films among others In addition Zone looks at the films produced up to 1952 discussing public reception of early 3 D short films as well as longer features such as Power of Love in single strip anaglyphic projection in 1922 and Semyon Ivanov s 1941 autostereoscope Robinson Crusoe He integrates his examination of the evolution of 3 D film with other cinematic developments demonstrating the connection between stereoscopic motion pictures and modern film production Stereoscopic Cinema and the Origins of 3 D Film 1838 1952 is an exhaustive study of not only the evolution of 3 D technology and the subsequent filmmaking achievements but also the public response to and cultural impact of 3 D movies Zone takes the reader on a voyage of discovery into the rich history of a field that predates photography and that continues to influence television and computer animation today **Hardship,**

Greed, and Sorrow Devorah Romanek, 2019-09-05 In the aftermath of the Civil War New Mexico Territory endured painful years of hardship and ongoing strife During this turbulent period a U S military officer stationed in the territory assembled an album of photographs a series of still shots taken by one or more anonymous photographers Now some 150 years later Hardship Greed and Sorrow reproduces the anonymous officer s souvenir album in its totality Offering an important glimpse of the American Southwest in the mid 1860s the book opens with a thoughtful foreword by Jennifer Nez Denetdale who considers the varied and lingering effects that settlement conquest and nineteenth century photography had on the Apaches and Navajos In her insightful introduction accompanying the photographs curator and scholar Devorah Romanek places the photographs in historical context and explains their unusual provenance As she points out the 1866 album integrates a number of important themes in connection to the Civil War and Reconstruction periods including the French intervention in New Mexico and the internment of Navajos at the Bosque Redondo Indian Reservation The story of the album s provenance reads like a mystery some loose ends remain untied and some questions remain unanswered In addition to containing what may be the earliest extant photographs of Navajo Indians the album features both studio and field images of U S Army officers Mexican politicians and various sites throughout New Mexico According to Romanek a number of the album s photographs have appeared in other publications but with scant attention to their original context or purpose This compelling book reveals what we know about the collection its compiler and the photographer or photographers who captured such a fraught and complex moment in the history of the American Southwest **Consuming Identities** Amy DeFalco

Lippert, 2018-03-02 Along with the rapid expansion of the market economy and industrial production methods such innovations as photography lithography and steam printing created a pictorial revolution in nineteenth century society The proliferation of visual prints ephemera spectacles and technologies transformed public values and perceptions and its legacy was as significant as the print revolution that preceded it Consuming Identities explores the significance of the pictorial revolution in one of its vanguard cities San Francisco the revolving door of the gold rush In their correspondence diaries portraits and reminiscences thousands of migrants to the city by the Bay demonstrated that visual media constituted a

central means by which people navigated the bewildering host of changes taking hold around them in the second half of the nineteenth century from the spread of capitalism and class formation to immigration and urbanization Images themselves were inextricably associated with these world changing forces they were commodities but as representations of people they also possessed special cultural qualities that gave them new meaning and significance Visual media transcended traditional boundaries of language and culture that divided diverse groups within the same urban space From the 1848 conquest of California and the gold discovery to the disastrous earthquake and fire of 1906 San Francisco anticipated broader cultural transformations in the commodification implementation and popularity of images For the city s inhabitants and sojourners an array of imagery came to mediate intersect with and even constitute social interaction in a world where virtual reality was becoming normative

The Philosophy of the Western Jennifer L. McMahon, B. Steve Csaki, 2010-05-28 Essays about how stories of the Old West reflect and affect our beliefs and values The solitude of the lone rider the loyalty of his horse and the unspoken code of the West for many Western movies embody America and its values though the view of the country s history they present isn t always accurate In recent years scholars had declared the genre dead but a steady resurgence of western themes in literature film and television has reestablished its importance and influence In *The Philosophy of the Western* editors Jennifer L McMahon and B Steve Csaki examine philosophical themes in the western genre Investigating subjects of nature ethics identity gender environmentalism and animal rights the essays in this volume draw from a wide range of westerns including the more recent popular and critical successes *Unforgiven* *All the Pretty Horses* *3 10 to Yuma* and *No Country for Old Men* as well as literature and television serials such as *Deadwood* *The Philosophy of the Western* reveals the powerful role of the western in the American psyche

Human Virtuality and Digital Life Richard Frankel, Victor J. Krebs, 2021-08-12 Winner of the Grady Best Book Award 2022 and the Courage to Dream Book Prize 2023 from the Academy of the American Psychoanalytic Association This book is a psychoanalytic and philosophical exploration of how the digital is transforming our perception of the world and our understanding of ourselves Drawing on examples from everyday life myth and popular culture this book argues that virtual reality is only the latest instantiation of the phenomenon of the

virtual which is intrinsic to human being It illuminates what is at stake in our understanding of the relationship between the virtual and the real showing how our present technologies both enhance and diminish our psychological lives The authors claim that technology is a pharmakon at the same time both a remedy and a poison and in their writing exemplify a method that overcomes the polarization that compels us to regard it either as a liberating force or a dangerous threat in human life The digital revolution challenges us to reckon with the implications of what is being called our posthuman condition leaving behind our modern conception of the world as constituted by atemporal essences and reconceiving it instead as one of processes and change The book s postscript considers the sudden plunge into the virtual effected by the 2020 global pandemic Accessible and wide reaching this book will appeal not only to psychotherapists psychoanalysts and philosophers but anyone interested in the ways virtuality and the digital are transforming our contemporary lives

Aluminum Dreams
Mimi Sheller, 2014-02-14 How aluminum enabled a high speed gravity defying American modernity even as other parts of the world paid the price in environmental damage and political turmoil Aluminum shaped the twentieth century It enabled high speed travel and gravity defying flight It was the material of a streamlined aesthetic that came to represent modernity And it became an essential ingredient in industrial and domestic products that ranged from airplanes and cars to designer chairs and artificial Christmas trees It entered modern homes as packaging foil pots and pans and even infiltrated our bodies through food medicine and cosmetics In Aluminum Dreams Mimi Sheller describes how the materiality and meaning of aluminum transformed modern life and continues to shape the world today Aluminum Sheller tells us changed mobility and mobilized modern life It enabled air power the space age and moon landings Yet as Sheller makes clear aluminum was important not only in twentieth century technology innovation architecture and design but also in underpinning global military power uneven development and crucial environmental and health concerns Sheller describes aluminum s shiny utopia but also its dark side The unintended consequences of aluminum s widespread use include struggles for sovereignty and resource control in Africa India and the Caribbean the unleashing of multinational corporations and the pollution of the earth through mining and smelting and the battle to save it Using a single material as an entry point to understanding a global history of modernization and its implications for the future Aluminum Dreams forces us to ask How do we assemble the material culture of modernity and what are its environmental consequences Aluminum Dreams includes a generous selection of striking images of iconic aluminum designs many in color drawn from advertisements by Alcoa Bohn Kaiser and other major corporations pamphlets films and exhibitions
