fieldwork amongst the three religious groups The concept of religious reconfiguration developed in this book provides a framework for the study of religion in Vietnam which opens the way to further analysis from a comparative perspective Meanwhile an emphasis upon religious reinvention which addresses processes of remaking transforming legitimating and accommodating can be useful for research into New Religious Movements elsewhere in Asia A research in the challenges of new religions could act as a catalyst for interdisciplinary studies based on detailed empirical study of religious diversity and of religious freedom by other scholars It is hoped that this research might help to give a voice to religious minorities that are often the victim of stereotyping misunderstanding and punitive treatment The book is suitable for post graduate students and social researchers who are interested in religious revival religious diversification State religion relationships and State s regulation of new religions
