Physical Science

Newton's 3 laws of motion:

1st law: A body at rest remains at rest and a body in motion remains in motion until an outside force acts on it (inertia).

ex. The soccer ball will remain at rest on the field until someone kicks it. Also, after someone kicks that ball, it will stay in motion until gravity & friction from the field or another player stop it.

2nd law: A force causes an object to accelerate.

equation →

$$F = \text{mass} \times \text{acceleration}$$

A great example of Newton's 2nd law is in bowling. The mass of the bowling ball multiplied by how fast the ball is rolling determines how great the force is that hits the pins.

Another good example- looking at the equation → $F = m \times a$:

If you are traveling on the highway in your Honda Civic next to a semi truck, both vehicles are accelerating at 65mph, do they both have the same force? No, because their masses are different.
