

Teacher Professional Growth Plan - 2022

Winston Day Chief

Goal: To become more familiar with working with google classrooms for use in my own classroom. Students are more technologically driven now than ever and using google classrooms will create an opportunity for me to get my students more engaged

TQS Standard #2: Engaging in career-long learning

Strategies	Timeline	Resources
- Learn and use google classrooms for my IO - Post items in google classrooms for the students to use i.e. slides, feedback, assignments.	By the end of first term in school I should be able to use google classrooms comfortably	- Online workshops - Getting on google classrooms myself and "playing around with it" - Ask other teachers who are familiar with google classrooms for help

Measure of Success: My google classrooms will be available for my IO students throughout the first term

Reflecting on learning

Reflection at the midway point: I have created a google classroom for my traditional games class. IN the classroom I have included the course outline, games we have played as well as put the final assignment on the class.

Ohio Teacher Growth Plan:

Testing Teacher Candidates National Research Council, Division of Behavioral and Social Sciences and Education, Board on Testing and Assessment, Center for Education, Committee on Assessment and Teacher Quality, 2001-10-19 Americans have adopted a reform agenda for their schools that calls for excellence in teaching and learning. School officials across the nation are hard at work targeting instruction at high levels for all students. Gaps remain, however, between the nation's educational aspirations and student achievement. To address these gaps, policy makers have recently focused on the qualifications of teachers and the preparation of teacher candidates. This book examines the appropriateness and technical quality of teacher licensure tests currently in use, evaluates the merits of using licensure test results to hold states and institutions of higher education accountable for the quality of teacher preparation and licensure, and suggests alternatives for developing and assessing beginning teacher competence. Teaching is a complex activity. Definitions of quality teaching have changed and will continue to change over time as society's values change. This book provides policy makers, teacher testers, and teacher educators with advice on how to use current tests to assess teacher candidates and evaluate teacher preparation, ensuring that America's youth are being taught by the most qualified candidates. *International Teacher Development*

Implementing Reflective Practice in the K-12 Classroom Joanna C. Weaver, Cynthia D. Bertelsen, 2024-10-16 This resource offers teachers a simple framework to seamlessly add reflective practice to their day and encourages educators to critically reflect on instructional planning and practice. Commonly used in other busy professions, the SOAP Notes structure makes it easy to reflect on student progress through any lesson or learning activity regardless of grade band or content area. Each category—Subjective Observation, Assessment, and Planning—allows for documentation of obstacles, difficulties, or challenges within a lesson so educators can address these concerns in subsequent lessons. Each chapter features an in-service teacher who used SOAP Notes reflections in their classrooms to improve their instruction and student learning. Contributors are from diverse teaching backgrounds, schools, and student populations. The authors include instructions for using the template in a variety of scenarios, blank worksheets, completed SOAP examples, and important takeaways. Whether there is an hour or only minutes in the day to focus on reflective practice, these teachers demonstrate how this framework makes this activity possible in any classroom. Ideal for preservice and in-service teachers, administrators, and other education professionals across K-12 settings, this accessible read demonstrates the ease of reflective practice while celebrating teacher voices. This simple structure makes adding reflection and intention to teachers' routine immediately doable.

10 Models of Teacher Evaluation David Silverberg, Linda Jungwirth, 2014-02-04 For the first time, school districts around the country are being required to adopt formal accountability measures to assess teacher effectiveness. In a radical shift, teacher quality will be based on outputs—student achievement, teacher observations—rather than inputs—years of service, degrees attained. This change in school culture and practice is an attempt to improve everything from individual

student learning to national economic competitiveness It also requires that administrators implement new and rigorous teacher evaluation programs that align with state and federal guidelines Busy administrators lack the training and experience necessary to quickly and efficiently craft a teacher evaluation system that successfully meets the needs of their district Questions like What is the best program for my district or How do I get the teachers on board are being asked by school leaders across the country This book provides real world answers by highlighting 10 diverse model programs from around the country

Supervision and Evaluation for Learning and Growth Daniel R. Tomal, Robert K. Wilhite, Barbara Phillips, Paul A.
