Illustrated History of the World is the story of humanity itself from earliest times to the present day and the changes good and bad which have shaped our world The Oxford History of the World Felipe Fernández-Armesto, 2023-05-10 Histories you can trust Imagine the planet as if from an immense distance of time and space as a galactic observer might see it with the kind of objectivity that we who are enmeshed in our history can't attain The Oxford History of the World encompasses the whole span of human history It brings together some of the world's leading historians under the expert guidance of Felipe Fernandez Armesto to tell the 200 000 year story of our world from the emergence of homo sapiens through to the twenty first century the environmental convulsions the interplay of ideas good and bad the cultural phases and exchanges the collisions and collaborations in politics the successions of states and empires the unlocking of energy the evolutions of economies the contacts conflicts and contagions that have all contributed to making the world we now inhabit *The Life and Death of Ancient Cities* Greg Woolf, 2020 The growth of the modern world urban system is the greatest episode of urban growth there has ever been but it is not the first Three thousand years ago most of the Mediterranean basin was a world of villages a world without money or writing without temples for the gods or palaces for the mighty Over the centuries that followed however an extraordinary series of civilizations grew up around the Inland Sea They included those of the Greeks and Romans but also others created by Etruscans and Phoenicians by Tartessians and Lycians and eventually by many others At the heart of all these cultures was the city Most ancient cities were tiny by modern standards but they were the building blocks of all the states and empires of classical antiquity the places where new literatures and art forms were created the motors of history and the most fiercely contested prizes of warfare The greatest cities Athens and Corinth Syracuse and Marseilles Alexandria and Ephesus Antioch and Carthage Rome and Byzantium became the powerhouses of successive ancient societies And then for reasons that remain mysterious the cities withered away leaving behind evocative ruins that have fascinated and inspired so many who came after The Life and Death of Ancient Cities tells the story of the rise and collapse of Europe's first great urban experiment Drawing on the latest historical and archaeological evidence Greg Woolf provides a rich narrative history of the ancient Mediterranean city and attempts to solve the puzzles about its rapid emergence and equally rapid decline making comparisons along the way with contemporary urban experience Containing dozens of illustrations with sidebar commentaries on specific urban themes this book will appeal to all students and general readers of ancient history The Unstoppable Human Species John J. Shea, 2023-03-23 This book asks new and interesting questions about how our prehistoric ancestors survived and how they settled the world Beyond Heaven and Earth Gabriel Levy, 2022-02-08 An approach to understanding religion that draws on both humanities and natural science but rejects approaches that employ simple monisms and radical dualisms In Beyond Heaven and Earth Gabriel Levy argues that collective religious narratives and beliefs are part of nature they are the basis for the formation of the narratives and beliefs of individuals Religion grows out of the universe but to make sense of it we have to recognize the paradox that the universe is

both mental and material or neither We need both humanities and natural science approaches to study religion and religious meaning Levy contends but we must also recognize the limits of these approaches First we must make the dominant metaphysics that undergird the various disciplines of science and humanities more explicit and second we must reject those versions of metaphysics that maintain simple monisms and radical dualisms Bringing Donald Davidson s philosophy a form of pragmatism known as anomalous monism to bear on religion Levy offers a blueprint for one way that the humanities and natural sciences can have a mutually respectful dialogue Levy argues that in order to understand religions we have to take their semantic content seriously We need to rethink such basic concepts as narrative fiction information agency creativity technology and intimacy In the course of his argument Levy considers the relation between two closely related semantics fiction and religion and outlines a new approach to information He then applies his theory to discrete cases ancient texts modern media and intimacy
