Preparing Americas Teachers A History Reflective History Series:

Forward Without Fear Derek Taira, 2024-06 During Hawai i s territorial period 1900 1959 Native Hawaiians resisted assimilation by refusing to replace Native culture identity and history with those of the United States By actively participating in U S public schools Hawaiians resisted the suppression of their language and culture subjection to a foreign curriculum and denial of their cultural heritage and history which was critical for Hawai i s political evolution within the manifest destiny of the United States In *Forward without Fear* Derek Taira reveals that many Native Hawaiians in the first forty years of the territorial period neither subscribed nor succumbed to public schools aggressive efforts to assimilate and Americanize them but instead engaged with American education to envision and support an alternate future one in which they could exclude themselves from settler society to maintain their cultural distinctiveness and protect their Indigenous identity Taira thus places great emphasis on how they would have understood their actions as flexible and productive steps for securing their cultural sovereignty and safeguarding their future as Native Hawaiians and reshapes historical understanding of this era as one solely focused on settler colonial domination oppression and elimination to a more balanced and optimistic narrative that identifies and highlights Indigenous endurance resistance and hopefulness **Moral**

Education in America B. Edward McClellan, 1999 This one of a kind comprehensive history of moral education in American schools provides an invaluable historical context for contemporary debates McClellan traces American traditions of moral education from the colonial era to the present illuminating both debates about the subject and actual practices in public and private schools colleges and universities He pays particular attention to changing fashions in pedagogy to church state conflicts to the long decline of character training in the schools and to recent efforts to restore moral education to its once honored place The book concludes with a thorough examination of recent theorists including Lawrence Kohlberg William J Bennett Carol Gilligan and Nel Noddings and an appraisal of current practice in American schools In an age of specialists who quite productively write books on relatively narrow subjects imbedded in short time periods McClellan writes effortlessly about the grand themes and social practices in the history of moral education and character training over several centuries From the Foreword by William J Reese I would highly recommend this work to anyone interested in educational policy in general and moral education in particular There is nothing presently available that is comparable in scope balance intellectual coherence and readability Ray Hiner University of Kansas **An Historical Introduction to American**
