Readiness 101 G. Peltz, 2018-02-22 Some people want you to believe that you need freeze dried prepackage food that will last a hundred years and a zombie proof underground bunker in your backyard in order for you to be ready for a disaster Of course those people are also probably more than happy to sell you that food and charge you to install that bunker With a little knowledge and some basic planning you can be ready for the kind of disasters that happen all around us on a regular basis This book is a plain language common sense everyday approach to being prepared for a real world disaster It is not a Prepper s guide to the end of the world but rather an everybody s guide to being prepared in case of real world emergencies like a snowstorm hurricane tornado or flood If you have a family or live in a home or breathe well then one day you just might need this book Because whether it s the end of the world or just the storm of the decade sooner or later you are going to have a day that is just not going to be normal And on that day the superstores will be closed the grocery stores

will be closed the greasy clowns will be closed and if they re not even if all of those places are somehow still open you just might not be able to get to them The easy conversational tone of the writing the use of everyday supplies that don t need to be found at a survival store or ordered off of the internet and the lack of digging zombie proof shelters make it a book for the less paranoid among us The purpose of this book is simply to present you with some basic common sense survival techniques to help you be more prepared in the event of a disaster than you might currently be It is not to give you instructions on surviving a specific type of disaster It is strictly a book about being prepared to survive the effects common to many disaster scenarios such as not having access to food and water living without public utilities for a period of time and holding out on your own until either civilization is restored or you can be rescued and moved to a safer place START PREPPING!: GET PREPARED—FOR LIFE Tim Young, The ultimate guide to personal preparedness No scare tactics Just a 10 step guide to practical preparedness for every family You don t like to think about it but deep down you know it can happen Disaster can strike without warning leaving your family without water food or electricity and without medical or police support How will you survive when that happens How will you protect your family from threats of violence Buying insurance writing wills getting our teeth cleaned and saving for retirement are just a few of the precautions we routinely take to mitigate risks but most people fail to prepare for what s most important They fail to prepare for their own survival With 91% of Americans living in places at a moderate to high risk of disasters and with all of us dependent on a very fragile life support system it s time for you to take preparedness seriously After reading this book you will understand the 27 disasters you re likely to face know why some people survive when others don t and how to ensure your family survives master situational awareness and the survival mindset you need to avoid becoming a victim of violence know when to stay when to bug out and how to implement an evacuation plan learn the best non firearm options for self defense discover the best ways to generate electricity store water and food and handle sanitation and medical care on your own Start Prepping is the most actionable common sense guide to personal preparedness It will help your family comfortably survive everything from pandemics to manmade and natural disasters And it will help you stay safe from civil unrest and everyday violence We can t hide from the risks we face but we can prepare for them Read Start Prepping now and give yourself some peace of mind Because the day after disaster strikes is too late **Disaster Survival 101** Creek Stewart,2024-12-03 Be prepared for any disaster and put your mind at ease with this step by step plan for surviving natural disasters technological and grid failures attacks hazards and more including sheltering in place or evacuating as conditions dictate Are you prepared for a widespread electrical grid failure What would you do if there was a sudden tornado warning Will you be ready when disaster strikes In Disaster Survival 101 survival expert and bestselling author Creek Stewart cuts through the panic and fear emergency situations can create so you can ensure all safety measures are in place should you ever need them In this guide you ll learn how to understand disaster preparedness and develop a prepared mindset that will help you make important well informed decisions in an

emergency With detailed chapters on food storage water sourcing heating power generation first aid and an overview of self sufficient living so you ll be fully prepared to shelter in place at your home And with evacuation chapters that explain what to take where to go and how to get there safely you ll be well prepared with a plan for any kind of emergency You ll also find step by step plans that help you take action and survive when caught in the midst of more than twenty likely emergency scenarios including natural disasters physical safety threats technology and grid failures and other emergencies including pandemics and nuclear biological and chemical threats Organized by scenario each entry gives an overview of the situation a checklist of immediate actions to take to ensure safety and checklists to assess whether to shelter in place or evacuate and how to successfully execute either decision When every moment and decision counts you will be ready with Disaster Survival
