China's Tibet Xiaoming Zhang, 2004 **Early Tang China and the World, 618-750 CE** Shao-yun Yang, 2023-05-25 For about half a century the Tang dynasty has held a reputation as the most cosmopolitan period in Chinese history marked by unsurpassed openness to foreign peoples and cultures and active promotion of international trade Heavily influenced by Western liberal ideals and contemporary China's own self-fashioning efforts this glamorous image of the Tang calls for some critical reexamination This Element presents a broad and revisionist analysis of early Tang China's relations with the rest of the Eurasian world and argues that idealizing the Tang as exceptionally cosmopolitan limits our ability to think both critically and globally about its actions and policies as an empire

Tibet China Caidan An, 2003

The Mongols at China's Edge Uradyn E. Bulag, 2002-04-03 This important study explores the multifaceted Mongol experience in China past and present Combining insights from anthropology history and postcolonial criticism Uradyn Bulag avoids romanticizing Mongols either as pacified primitive Other or as gallant resistance fighters Rather he portrays them as a people whose communist background and standing in China's northern borderlands has informed their political efforts to harness or confront Chinese nationalistic and political hegemony Breaking new ground in the study of

Chinese and Mongol history and ethnicity the author offers a fresh interpretation of China viewed from the perspective of its peripheries and of minority nationalities in relation to the study of Chinese representation and minority self representation The author interrogates received wisdom about Chinese and minority nationalism by unraveling the Chinese discourse and practice of national unity He shows how the discourse was constructed over time through political rituals and sexuality in relation to Mongols and other non Chinese peoples that hark back to Chinese Xiongnu confrontations two millennia ago and Manchu conquest in the 17th and 18th centuries Titular rulers of an autonomous region in which they constitute a minority Mongols face enormous barriers in building and maintaining a socialist Mongolian nationality and a Mongolian language and culture Acknowledging these difficulties Bulag discusses a range of sensitive issues including the imbrication of nation class and ethnicity in the context of Mongol Chinese relations tensions inherent in writing a postrevolutionary history for a socialist nationality and the moral dilemma of building a socialist model with Mongol characteristics Charting the interface between a state centered multinational Chinese polity and a primordial nationalist multiculturalism that aims to manage minority nationalities as cultures he explores Mongol ethnopolitical strategies to preserve their heritage
