Preventing Partner Violence Research And Evidence Based Intervention Strategies:

Preventing Partner Violence Daniel J. Whitaker, John R. Lutzker, 2015-06-04 In the past 30 years the study of intimate partner violence IPV has advanced considerably Previously IPV was conceptualized narrowly as male physical violence against women due to a need for dominance Now experts realize that a variety of factors are associated with IPV and that IPV takes many forms from verbal abuse or slapping to highly violent physical abuse or rape In addition research shows that women are often the perpetrators of IPV As a result IPV interventions have shifted over time from gender focused interventions to gender neutral interventions with an emphasis on empirical evidence Preventing Partner Violence presents a comprehensive overview of the most up to date research on IPV Leading experts in the field cover a large range of topics including theory risk factors health effects surveillance prevention and intervention The editors emphasize understanding the development of IPV perpetration by itself and in the context of other risk factors Above all they demonstrate the complexity of IPV and the importance of taking an empirical approach to prevention and treatment This cutting edge book should be read by every IPV researcher and intervention provider In addition readers from the related fields of social work criminal justice victims rights public health nursing medicine and public policy will benefit from this outstanding collection
