F. GLOBAL & PROJECT CALENDARS

You can create and assign calendars to each resource and each activity. These calendars define the available work hours in each calendar day. You can also specify national holidays, your organization's holidays, project-specific work/non-work days, and resource vacation days. Calendar assignments are used for activity scheduling, tracking, and resource leveling. Whether an activity uses its assigned calendar or the calendar of an assigned resource depends on the activity type you specify.

Three calendar pools are defined: **Global**, **Resource**, and **Project**. The global calendar pool contains calendars that apply to all projects. The project calendar pool is a separate pool of calendars for each project. The resource calendar pool can be a separate pool of calendars for each resource. You can assign either resource or global calendars to resources, and you can assign either global or project calendars to activities.

You can link resource and project calendars to global calendars. Then, if you make changes to a global calendar, your changes apply to all resource and project calendars that are linked to the modified global calendar.

Fleming,Joel M. Koppelman,2016-12-20 Earned Value Project Management EVPM is a methodology used to measure and communicate the real physical progress of a project taking into account the work completed the time taken and the costs incurred to complete that work As a result EVPM allows more educated and effective management decision making which helps evaluate and control project risk by measuring project progress in monetary terms In the first two editions of Earned Value Project Management Quentin W Fleming and Joel M Koppelman provided guidance for project management practitioners already familiar with EVPM was well as those who were new to the use of this technique The third edition

expanded the information available on of EVPM for medium and smaller projects while still being relevant for larger projects. An important addition to Earned Value Project Management Fourth Edition is the discussion of the two perceptions of the EVM concept. Both are valid but one is better suited to the management of major projects while the other appropriate for use on all projects. The authors cover both perceptions in this book with a bias in favor of simple broad based EVM for use on all projects.
