Ribeiro**

Princess Who Danced With Cranes Reports 1:

Crane Boy Diana Cohn, 2015-09-28 Every year Kinga and his classmates wait for the black necked cranes to return to the kingdom of Bhutan. The birds fly south over the highest mountains in the world to winter in the valley where Kinga lives deep in the Himalayas. The cranes have been visiting the valley since ancient times but every year fewer cranes return. Kinga is concerned. What can he do? He wonders. He and his classmates approach the monks for permission to create and perform a dance to honor the cranes and to remind the Bhutanese people of their duty to care for them. The monks caution them to first watch the cranes to see how they move and learn from them. The children watch and practice. And practice some more until the big day when they perform before the king of Bhutan. Diana Cohn is an educator and writer with an active commitment to social justice work. She has published six picture books for children. *Crane Boy* was inspired by two visits to Bhutan and by her interest in how cultural traditions evolve and adapt over time. Youme is an author, illustrator, and community based artist who has worked internationally in Asia, Africa, and the Caribbean. Her first book *Selavi That is Life* won the 2005 Jane Addams Peace Award. Pitch *Black Don't Be Skerd*, a graphic novel she co-authored with Anthony Horton, was named one of YALSA's Top Ten Great Graphic Novels in 2009. [Korean Report](#), 1965 **Canadian Literary Periodicals Index**, 1998

Willing's Press Guide, 1939 Coverage of publications outside the UK and in non-English languages expands steadily until in 1991 it occupies enough of the Guide to require publication in parts. 1995 issued in 2 vols. 2003 issued in 3 vols.

Oudry's Painted Menagerie Mary Morton, 2007-06-25 In the 1720s and 1730s Jean Baptiste Oudry established himself as the preeminent painter in France of hunts, animals, still lifes, and landscapes. Oudry's *Painted Menagerie* focuses on a suite of eleven life-size portraits of exotic animals from the royal menagerie at Versailles, painted by Oudry between 1739 and 1752. These paintings eventually found their way into the ducal collection in Schwerin, Germany. Among them is the magnificent portrait of Clara, an Indian rhinoceros who became a celebrity in mid-eighteenth-century Europe. Her portrait has been out of public view for more than a century and it is presented here in its newly conserved state. **Dance, Spectacle, and the**

Body Politick, 1250-1750 Jennifer Nevile, 2008-06-25 From the mid 13th to the mid 18th century, the ability to dance was an important social skill for both men and women. Dance performances were an integral part of court ceremonies and festivals, and in the 17th and 18th centuries, of commercial theatrical productions. Whether at court or in the public theater, danced spectacles were multimedia events that required close collaboration among artists, musicians, designers, engineers, and architects, as well as choreographers. In order to fully understand these practices, it is necessary to move beyond a consideration of dance alone and to examine it in its social context. This original collection brings together the work of 12 scholars from the disciplines of dance and music history. Their work presents a picture of dance in society from the late medieval period to the middle of the 18th century and demonstrates how dance practices during this period participated in the intellectual, artistic, and political cultures of their day. **Dance Data, Cognition, and Multimodal Communication**

Carla Fernandes, Vito Evola, Cláudia Ribeiro, 2022-09-08 Dance Data Cognition and Multimodal Communication is the result of a collaborative and transdisciplinary effort towards a first definition of dance data with its complexities and contradictions in a time where cognitive science is growing in parallel to the need of a renewed awareness of the body's agency in our manyfold interactions with the world. It is a reflection on the observation of bodily movements in artistic settings and one that views human social interactions, multimodal communication and cognitive processes through a different lens than that of the close collaboration between performing artists, designers and scholars. This collection focuses simultaneously on methods and technologies for creating, documenting or representing dance data. The editors highlight works focusing on the dancers' embodied minds including research using neural, cognitive, behavioural and linguistic data in the context of dance composition processes. Each chapter deals with dance data from an interdisciplinary perspective, presenting theoretical and methodological discussions emerging from empirical studies as well as more experimental ones. The book, which includes digital Support Material on the volume's Routledge website, will be of great interest to students and scholars in contemporary dance, neuro-cognitive science, intangible cultural heritage, performing arts, cognitive linguistics, embodiment, design, new media and creativity studies.

Broken Voices Roald Maliangkay, 2018-03-31 *Broken Voices* is the first English language book on Korea's rich folksong heritage and the first major study of the effects of Japanese colonialism on the intangible heritage of its former colony. Folksongs and other music traditions continue to be prominent in South Korea, which today is better known for its technological prowess and the Korean Wave of popular entertainment. In 2009 many Koreans reacted with dismay when China officially recognized the folksong Arirang, commonly regarded as the national folksong in North and South Korea, as part of its national intangible cultural heritage. They were vindicated when versions from both sides of the DMZ were included in UNESCO's Representative List of the Intangible Cultural Heritage of Humanity a few years later. At least on a national level, folksongs thus carry significant political importance. But what are these Korean folksongs about and who has passed them on over the years and how? *Broken Voices* describes how the major repertoires were transmitted and performed in and around Seoul. It sheds light on the training and performance of professional entertainment groups and singers, including kisaeng, the entertainment girls often described as Korean geisha. Personal stories of noted singers describe how the colonial period, the media, the Korean War and personal networks have affected work opportunities and the standardization of genres. As the object of resentment and competition and a source of creative inspiration, the image of Japan has long affected the way in which Koreans interpret their own culture. Roald Maliangkay describes how an elaborate system of heritage management was first established in modern Korea and for what purposes. His analysis uncovers that folksong traditions have changed significantly since their official designation, one major change being gender representation and its effect on sound and performance. Ultimately *Broken Voices* raises an important issue of cultural preservation: traditions that fail to attract practitioners and audiences are unsustainable, so compromises may be unwelcome but imperative.
