Principles And Practices In Spice Crops Cultivation:

Principles And Practices In Spice Crops Cultivation Ramesh Chandra Upadhyaya, R.C., 2008-01-01 Spices are those plants the products of which are made use as food adjuncts to add aroma and flavor. It contains essential oils which provide the flavor and taste. They also stimulate digestion on account of their carminative properties. Most spices increase the shelf life of foods, especially the dry varieties.

Cultivation of Spice Crops Azhar Ali Farooqi, B. S. Sreeramu, K. N. Srinivasappa, 2005 Spices constitute an important group of agricultural commodities which since antiquity have been used for flavouring foods. Some species are used in the pharmaceutical, perfumery, cosmetics and related industries and others possess colourant, preservative, antioxidant, antiseptic and antibiotic properties. India is one of the leading spice producing and exporting countries in the world. In addition, large quantities of spices are consumed within the country for seasoning of food and for several other purposes. No other country in the world has such a diverse variety of spice crops as India. This book reflects the intensive research carried out on this group of 42 spice crops since 1971. The improvement in agro techniques and the release of many high yielding varieties. It provides exhaustive information on all aspects of cultivation, harvesting and processing of each crop and will be an invaluable aid to students, teachers and growers of spice crops both individual and corporate.

Handbook on Spices and Condiments (Cultivation, Processing and Extraction) H. Panda, 2010-10-01 The term spice and condiments applies to natural plant or vegetable products or mixtures in whole or ground form which are used for imparting flavour, aroma and piquancy to the food items. Spices and condiments are a major commercial crop in India and earn a major part of foreign exchange annually. They have been the backbone of agricultural industry. The importance of spices and condiment in dietary, medicinal and other uses and their commercial importance are immense. India is known the world over as the home of spices. Thus spices are an important group of agricultural goods which are virtually indispensable in the culinary art. Spice processing includes different steps: spice cleaning, spice reconditioning and spice grinding. Some spices were also used for preserving food like meat for a year or more without refrigeration. In the 16th century, cloves for instance were among the spices used to preserve food without refrigeration. Cloves contain a chemical called eugenol that inhibits the growth of bacteria. It is a natural antibiotic. It is still used to preserve food like Virginia Ham. Likewise, later mustard and ground mustard were also found to have preservative qualities. India alone contributes 25-30% of the total world trade in spices. It may be interesting to note that nine spices namely pepper, ginger, clove, cinnamon, cassia, mace, nutmeg, pimento, allspice and cardamom alone contributed as much as 90% of the total world trade. Pepper is the most important spice in the world and so also of India. This book basically deals with brief history of spices, uses of spices, world trade in spices, area production of spices in India, area and production of spices in India, major and minor spices of India, spice processing, quality issues with spices, bird chillies and Tabasco chillies, basil or sweet basil, seasoning blend, duplication and tricks, sauces and gravies, snack seasonings, quality issues with spices etc.

This book is a single compendium which deals with all aspects and facts of spices and condiments which may meet the requirements of all those handling them at various stages from harvesting to their end use This book contains post harvest management the potentials of genetic engineering high production technology in spices with plantation and processing of various spices and condiments such as vanilla turmeric tamarind saffron black pepper onion mint ginger garlic curry leaf coriander etc Management of Horticultural Crops T. Pradeepkumar,2008-01-05 In Indian context Sustainable Agriculture R.S. Meena,2019-01-01 The book promotes the study and application of the agro ecology for developing alternatives to the complex problems of resource depletion environmental degradation a narrowing of the agrobiodiversity consolidation and industrialization of the food system climate change and the loss of farmland This book covers food systems approaches and seek experiences in an ecofriendly that are on farm participatory change oriented and backed by broad based methodologies for sustainability analysis and evaluation The objectives of this book are 1 to understand the role sustainable agricultural productivity and its importance to the sustainable soil management 2 to restore the soil health to transforming agriculture for sustainability and 3 to understand the matching of management rules in the climatic perspective

Neem in Sustainable Agriculture S.S. Narwal,P. Tauro , S.S. Bisla,2003-06-11 Neem is a versatile tree of Indian origin Since ancient times its various plant parts have been used to control domestic insects stored grain pests crop pests and for human and livestock medicine Recently these properties have been attributed to hundreds of chemicals present in this Golden tree Being a storehouse of chemicals with multiple uses and adaptability to diverse habitats and climatic conditions the developed countries have been shown keen interest in this tree Besides the present day pesticides and nitrogen fertilizers pose several problems viz environmental pollution and related health hazards in human and livestock insects While neem chemicals have shown potential as pesticides and as nitrification inhibitors and do not pose these problems moreover neemcake is used as manure This book will be most useful to neem scientists working in agriculture and forestry and to environmental conscious farmers of developed countries and to the educated farmers of Third World countries intending to practice Sustainable Agriculture Agriculture, Ancient and Modern: a Historical Account of Its Principles and Practice, Exemplified in Their Rise, Progress, and Development Samuel Copland,1866 Encyclopaedia of Horticulture and Allied Science R. C. Upadhyaya,2008 Underexploited Spice Crops Amit Baran Sharangi,Pemba H. Bhutia,Akkabathula Chandini Raj,Majjiga Sreenivas,2018-10-03 Spices provide our food with nutraceutical value rather than actual nutrition But apart from the popular and major spices there are several other spices which in spite of their enormous contribution to human health remain underexploited or underutilized This new volume Underexploited Spice Crops Present Status Agrotechnology and Future Research Directions is a valuable compilation of agrotechniques coupled with background information research works and scientific discussions on these spices It will include in depth narration on underexploited spice crops as products in influencing present day the global export market and the renewed interest in these crops throughout the world The

volume deals with the scientific approach of growing underexploited spices with the intention of popularizing them. Separate chapters on the importance of each spice, methods of growing and harvesting and recent research from around the world along with future strategies are covered.

The Complete Book on Spices & Condiments (with Cultivation, Processing & Uses) 2nd Revised Edition NIIR Board of Consultants & Engineers, 2006-04-01

The term spices and condiments applies to such natural plant or vegetable products and mixtures thereof used in whole or ground form mainly for imparting flavor, aroma and piquancy to foods and also for seasoning of foods, beverages like soups. The great mystery and beauty of spices is their use, blending and ability to change and enhance the character of food. Spices and condiments have a special significance in various ways in human life because of its specific flavours, taste and aroma. Spices and condiments play an important role in the national economies of several spice producing, importing and exporting countries. India is one of the major spice producing and exporting countries. Most of the spices and herbs have active principles in them and development of these through pharmacological and preclinical and clinical screening would mean expansion of considerable opportunities for successful commercialization of the product. Spices can be used to create these health promoting products. The active components in the spices: phthalides, polyacetylenes, phenolic acids, flavanoids, coumarines, triterpenoids, sterols and monoterpenes are powerful tools for promoting physical and emotional wellness. India has been playing a major role in producing and exporting various perennial spices like cardamoms, pepper, vanilla, clove, nutmeg and cinnamon over a wide range of suitable climatic situations. To produce good quality spice products, attention is required not only during cultivation but also at the time of harvesting, processing and storing. Not as large as in the days when next to gold, spices were considered most worth the risk of life and money. The trade is still extensive and the oriental demand is as large as ever. Some of the fundamentals of the book are: definition of spices and condiments, nomenclature or classification of spices and condiments, Indian central spices and cashew nut, committee origin, properties and uses of spices, forms, functions and applications of spices, trends in the world of spices, yield and nutrient uptake by some spice crops grown in sodic soil, tissue culture and in vitro conservation of spices, in vitro responses of piper species on activated charcoal supplemented media, soil agro climatic planning for sustainable spices production, potentials of biotechnology in the improvement of spice crops, medicinal applications of spices and herbs, medicinal properties and uses of seed spices, effect of soil solarization on chillies, spice oil and oleoresin from fresh, dry spices etc. The present book contains cultivation, processing and uses of various spices and condiments which are well known for their multiple uses in every house all over world. The book is an invaluable resource for new entrepreneurs, agriculturists, agriculture universities and technocrats.
