Rising Above the Wave Walt Christie, 2015-09-30 **Rising Above the Wave** Edward Muesch, 2008-08 author and sailor Ed Muesch chronicles his and his wife Helen's terrifying experience resulting from the tsunami on December 26 2004 at Phi Phi Don Island in Thailand Facing the Wave Gretel Ehrlich, 2013-02-12 Kirkus Best Books of the Year 2013 Kansas City Star Best Books of the Year 2013 A passionate student of Japanese poetry theater and art for much of her life Gretel Ehrlich felt compelled to return to the earthquake and tsunami devastated Tohoku coast to bear witness listen to survivors and experience their terror and exhilaration in villages and towns where all shelter and hope seemed lost In an eloquent narrative that blends strong reportage poetic observation and deeply felt reflection she takes us into the upside down world of northeastern Japan where nothing is certain and where the boundaries between living and dying have been erased by water The stories of rice farmers monks and wanderers of fishermen who drove their boats up the steep wall of the wave and of an eighty four year old geisha who survived the tsunami to hand down a song that only she still remembered are both harrowing and inspirational Facing death facing life and coming to terms with impermanence are equally compelling in a landscape of surreal desolation as the ghostly specter of Fukushima Daiichi the nuclear power complex spews radiation into the ocean and air Facing the Wave is a testament to the buoyancy spirit humor and strong mindedness of those who must find their way in a suddenly shattered world **Tsunamis** Marne Ventura, 2019-08-01 A big tsunami hit Japan's coast in March 2011 The tallest wave was as high as a 12 story building Find out more in Tsunamis one of the titles in the Surviving series Surviving is a series of AV2 media enhanced books A unique book code printed on page 2 unlocks multimedia content These books come alive with video audio weblinks slideshows activities hands on experiments and much more Black Wave Daniel P. Aldrich, 2019-07-11 Despite the devastation caused by the magnitude 9.0 earthquake and 60 foot tsunami that struck Japan in 2011 some 96% of those living and working in the most disaster stricken region of Tohoku made it through Smaller earthquakes and tsunamis have killed far more people in nearby China and India What accounts for the exceptionally high survival rate And why is it that some towns and cities in the Tohoku region have built back more quickly than others Black Wave illuminates two critical factors that had a direct influence on why survival rates varied so much across the Tohoku region following the 3.11 disasters and why the rebuilding process has also not moved in lockstep across the region Individuals and communities with stronger networks and better governance Daniel P Aldrich shows had higher survival rates and accelerated recoveries Less connected communities with fewer such ties faced harder recovery processes and lower survival rates Beyond the individual and neighborhood levels of survival and recovery the rebuilding process has varied greatly as some towns and cities have sought to work independently on rebuilding plans ignoring recommendations from the national government and moving quickly to institute their own visions while others have followed the guidelines offered by Tokyo based bureaucrats for economic development and rebuilding **I Survived the Japanese Tsunami, 2011 (I**
