Public Management Reform and Modernization Edoardo Ongaro,2009 Ongaro has made a major contribution to understanding the political and administrative systems of Southern Europe The work goes beyond that however by providing an excellent example of comparative analysis in general This book should be read by all students of comparative administration B Guy Peters University of Pittsburgh US and City University of Hong Kong This is an important book for several reasons Public sector reform debates and policies have been heavily perhaps too heavily influenced by Anglo Saxon models and literature on reforms in the Latin part of Europe has until now only been available in a fragmented way However this unique new book offers a coherent vision across Southern Europe It refers to important parts of our history and how these still influence current times It also shows that culture does make a difference and that contingencies are important European public sector reform is as diverse as the range of its administrative histories and this book is therefore crucial in our understanding of the

future in relation to the past Geert Bouckaert Public Management Institute Katholieke Universiteit Leuven Belgium and European Group for Public Administration This systematic thorough and insightful book offers one of the very rare comparative studies of public management reform in Italy France Greece Portugal and Spain A unique and most valuable study Walter Kickert Erasmus University Rotterdam the Netherlands Scholars of public management reform have been at it for many years but there was always a gap little was really known about southern Europe those countries that come from the Napoleonic tradition Now Professor Edoardo Ongaro of Bocconi University has filled that gap and we will all profit from his diligent and insightful work Jeffrey D Straussman Nelson A Rockefeller College of Public Affairs and Policy University at Albany US Theoretically eclectic and empirically rich this is a much needed volume on the dark side of the moon that is public management reform outside the Anglo Saxon world Edoardo Ongaro sheds light on Italy and four other Napoleonic systems by producing a far reaching comparative analysis that also captures the effects of Europeanization and multi level governance on public management reforms Ambitious yet ultimately accessible this book is a must read for those who want to explain and understand the trajectories of reform in their historical context Claudio Radaelli University of Exeter UK The reader will find in Professor Ongaro's book a clear and thorough discussion of the public sector reform process both in Italy and southern European countries based upon a systematic comparative framework This is a very useful and original work that any student in comparative politics or public administration will highly appreciate Luc Rouban CNRS Centre de Recherches Politiques de Science Po CEVIPOF Paris France This scholarly volume makes an interesting and distinctive contribution to the global public management reform debate by offering an analysis of reform trajectories in an important but rather neglected group of Southern European countries Ewan Ferlie King's College London UK Since the 1980s a wave of reforms of public management has swept the world The investigation into the effects of such major transformations has however been unbalanced important countries have received only limited attention This timely book fills the gap by investigating the dynamics of contemporary public management reform in five European countries that gave shape to the Napoleonic administrative tradition France Greece Italy Portugal Spain Edoardo Ongaro presents an in depth investigation of the reform of public management in these countries revisiting major topics of theoretical interest in the study of public administration He addresses key issues regarding the influence of the past on the transformation of the public sector Public Management Reform in Turkey Fatih Demir, 2020-02-24 This book discusses the Europeanization of Turkish public administration since the early 2000s offering an analysis of the transformation and basic features and problems of Turkish public administration in relation to the EU accession process The book consists of six chapters and a conclusion The first chapter sets the stage by evaluating the public administration reforms in Turkey from the perspective of Europeanization and the European Administrative Space EAS The second chapter discusses the administrative procedures based on the European Union's Charter of Fundamental Rights and explains the EU's relationship with accountable government and democracy The

third and fourth chapters examine the steps taken to improve civic participation in decision making processes and assess local governance reforms in Turkey with reference to Europeanization processes and the policy windows approach developed by Kingdon The next chapter addresses regionalization in Europe and its parallels in Turkey especially in the context of the foundation of regional development agencies Lastly the book presents the reactions to the fragmentation of government envisaged by New Public Management NPM reforms and describes practices beyond fashioning an integrated administration It also explores the transformation of the executive organ in terms of its change in status in relation to other centers of political power The conclusion provides an overview of the apparent oscillation of Turkish public administration in the 21st century in terms of Europeanization processes This book is useful for academics studying public administration public management reforms Turkish politics and the European Union as well as government and diplomatic professionals in Turkey and the EU especially those dealing with enlargement issues
