## **Pull The Power Of The Semantic Web To Transform Your Business:**

*Pull* David Siegel, 2009-12-31 The first clear guide to the Semantic Web and its upcoming impact on the business world Imagine that in 1992 someone handed you a book about the future of something called the World Wide Web This book claimed that through a piece of software called a browser which accesses web sites the world economy and our daily lives would change forever Would you have believed even 10 percent of that book Did you take advantage of the first Internet wave and get ahead of the curve *Pull* is the blueprint to the next disruptive wave Some call it Web 3.0 others call it the semantic web It's a fundamental transition from pushing information to pulling using a new way of thinking and collaborating online Using the principles of this book you will slash 5-20 percent off your bottom line make your customers happier accelerate your industry and prepare your company for the twenty first century It isn't going to be easy and you don't have any choice By 2015 your company will be more agile and your processes more flexible than you ever thought possible The semantic web leads to possibilities straight from science fiction such as buildings that can order their own supplies eliminating the IRS and lawyers finally making sense But it also leads to major changes in every field from shipping and retail distribution to health care and financial reporting Through clear examples case studies principles and scenarios business strategist David Siegel takes you on a tour of this new world You'll learn Which industries are already ahead Which industries are already dead How to make the power shift from pushing to pulling information How software hardware media and marketing will all change How to plan your own strategy for embracing the semantic web We are at the beginning of a new technology curve that will affect all areas of business Right now you have a choice You can decide to start preparing for the exciting opportunities that lay ahead or you can leave this book on the shelf and get left in the dust like last time *Design Thinking Business Analysis* Thomas Frisendal, 2012-09-27 This book undertakes to marry the concepts of Concept Mapping with a Design Thinking approach in the context of business analysis While in the past a lot of attention has been paid to the business process side this book now focusses information quality and valuation master data and hierarchy management business rules automation and business semantics as examples for business innovation opportunities The book shows how to take Business Concept Maps further as information models for new IT paradigms In a way this book redefines and extends business analysis towards solutions that can be described as business synthesis or business development Business modellers analysts and controllers as well as enterprise information architects will benefit from the intuitive modelling and designing approach presented in this book The pragmatic and agile methods presented can be directly applied to improve the way organizations manage their business concepts and their relationships This book is a great contribution to the information management community It combines a theoretical foundation with practical methods for dealing with important problems This is rare and very useful Conceptual models that communicate business reality effectively require some degree of creative imagination As such they combine the results of business analysis with communication design as is extensively covered in

this book Dr Malcolm Chisholm President at AskGet com Inc Truly understanding business requirements has always been a major stumbling block in business intelligence BI projects In this book Thomas Frisendal introduces a powerful technique business concept mapping that creates a virtual mind meld between business users and business analysts Frisendal does a wonderful explaining and demonstrating how this tool can improve the outcome of BI and other development projects Wayne Eckerson executive director BI Leadership Forum      The Semantic Web -- ISWC 2012 Philippe Cudré-Mauroux,Jeff Heflin,Evren Sirin,Tania Tudorache,Jerome Euzenat,Manfred Hauswirth,Josiane Xavier Parreira,Jim Hendler,Guus Schreiber,Abraham Bernstein,Eva Blomqvist,2012-10-28 The two volume set LNCS 7649 7650 constitutes the refereed proceedings of the 11th International Semantic Web Conference ISWC 2012 held in Boston MA USA in November 2012 The International Semantic Web Conference is the premier forum for Semantic Web research where cutting edge scientific results and technological innovations are presented where problems and solutions are discussed and where the future of this vision is being developed It brings together specialists in fields such as artificial intelligence databases social networks distributed computing Web engineering information systems human computer interaction natural language processing and the social sciences Volume 1 contains a total of 41 papers which were presented in the research track They were carefully reviewed and selected from 186 submissions Volume 2 contains 17 papers from the in use track which were accepted from 77 submissions In addition it presents 8 contributions to the evaluations and experiments track and 7 long papers and 8 short papers of the doctoral consortium      *Going Beyond Google Again* Jane Devine,Francine Egger-Sider,2014 The Invisible Web also known as the Deep Web is a huge repository of underutilized resources that can be richly rewarding to searchers who make the effort to find them Since Jane Devine and Francine Egger Sider explored the educational potentials of this realm in *Going Beyond Google The Invisible Web in Learning and Teaching* the information world has grown even more complex with more participants more content more formats and more means of access Demonstrating why teaching the Invisible Web should be a requirement for information literacy education in the 21st century here the authors expand on the teaching foundation provided in the first book and persuasively argue that the Invisible Web is still relevant not only to student research but also to everyday life Intended for anyone who conducts research on the web including students teachers information professionals and general users their book Defines the characteristics of the Invisible Web both technologically and cognitively Provides a literature review of students information seeking habits concentrating on recent research Surveys the theory and practice of teaching the Invisible Web Shows ways to transform students into better researchers Highlights teaching resources such as graphics videos and tutorials Offers an assortment of tools both public and proprietary for trawling the Invisible Web Looks at the future of the Invisible Web with thoughts on how changes in search technology will affect users particularly students learning to conduct research      **Semantic Web** Michael Workman,2015-08-27 This book examines recent developments in semantic systems that can respond to situations and environments and events The

contributors to this book cover how to design implement and utilize disruptive technologies The editor discusses the two fundamental sets of disruptive technologies the development of semantic technologies including description logics ontologies and agent frameworks and the development of semantic information rendering and graphical forms of displays of high density time sensitive data to improve situational awareness Beyond practical illustrations of emerging technologies the editor proposes to utilize an incremental development method called knowledge scaffolding a proven educational psychology technique for learning a subject matter thoroughly The goal of this book is to help readers learn about managing information resources from the ground up and reinforcing the learning as they read on

**The Chessboard and the Web** Anne-Marie Slaughter, 2017-03-28 From a renowned foreign policy expert a new paradigm for strategy in the twenty first century In 1961 Thomas Schelling's *The Strategy of Conflict* used game theory to radically reenvision the U S Soviet relationship and establish the basis of international relations for the rest of the Cold War Now Anne Marie Slaughter one of Foreign Policy's Top 100 Global Thinkers from 2009 to 2012 and the first woman to serve as director of the State Department Office of Policy Planning applies network theory to develop a new set of strategies for the post Cold War world While chessboard style competitive relationships still exist U S Iranian relations for example many other situations demand that we look not at individual entities but at their links to one another We must learn to understand shape and build on those connections Concise and accessible based on real world situations on a lucid understanding of network science and on a clear taxonomy of strategies this will be a go to resource for anyone looking for a new way to think about strategy in politics or business
