Transmedia Television M.J. Clarke, 2012-12-20 Faced with what many were calling a dying medium US network television producers became much more aggressive in seeking out alternative business and artistic models in the beginning of this century. Most significantly many of these producers turned to the emerging field of transmedia ancillary texts in comicbooks novels and new media as a way to bolster and support television products. In this book the author examines four such programs *24* *Alias* *Heroes* and *Lost* and investigates how transmedia was incorporated into both the work and the art of network television production. Split into two complementary parts the book first paints a picture of how transmedia producers were or were not incorporated into creative

decision making centers of these serialized programs The second section explains how the presence of off site transmedia texts begins to alter the very narrative construction of the on air series themselves Including interviews with the transmedia workers this groundbreaking study extends the field of television studies into brand new areas and brings a dying medium into the 21st Century

Documenting Trauma in Comics Dominic Davies,Candida Rifkind,2020-05-21 Why are so many contemporary comics and graphic narratives written as memoirs or documentaries of traumatic events Is there a specific relationship between the comics form and the documentation and reportage of trauma How do the interpretive demands made on comics readers shape their relationships with traumatic events And how does comics documentation of traumatic pasts operate across national borders and in different cultural political and politicised contexts The sixteen chapters and three comics included in Documenting Trauma in Comics set out to answer exactly these questions Drawing on a range of historically and geographically expansive examples the contributors bring their different perspectives to bear on the tangled and often fraught intersections between trauma studies comics studies and theories of documentary practices and processes The result is a collection that shows how comics is not simply related to trauma but a generative force that has become central to its remembrance documentation and study
