BRICS and International Tax Law Peter Antony Wilson, 2016-04-24 With the ongoing expansion of outbound foreign direct investment (FDI) in the countries representing the BRICS economic bloc (Brazil, Russia, India, China, and South Africa) and with all of them at the same time listed among the top seven countries plagued by tax evasion and avoidance in the guise of illicit outflows, the five governments both individually and through cooperative initiatives have devised new international tax strategies that are proving to be of great interest and value to other countries both developing and developed. The core of these strategies addresses the necessity of stemming the outflow of revenue while strongly supporting FDI both inbound and outbound while complying with international obligations including those arising from human rights laws. This book is the first in-depth commentary on this new and evolving area of international tax law. The detailed analysis covers the entire field of BRICS international tax law considering topics such as the following: information exchange procedures and pitfalls; response to the OECD's Base Erosion and Profit Sharing (BEPS) initiative; role of bilateral and multilateral double taxation conventions including the Multilateral Instrument and the Bilateral Investment Treaties; thin capitalization; transfer pricing; controlled foreign corporation rules; shortcomings related to authorities' limited manpower; international audit and investigation procedures; the BRICS approach to residence and mandatory and binding arbitration; and the BRICS approach to shaping the developing world's international tax system. Notably, the author personally conducted interviews with senior international representatives of the BRICS tax authorities as well as with leading BRICS academics and practitioners. Tax cases together with human rights and investment cases and administrative guidelines in all five countries are also included in the analysis. The study concludes with recommendations for improving each of the five countries' tax law and procedures, especially in the area of dispute resolution. The author's goal is to extend the existing body of knowledge of the BRICS international tax laws in order to assist in developing an understanding of the BRICS approach to dealing with evasion and avoidance, an approach which facilitates both outbound and inbound FDI, simplifies tax authority administration, and establishes a basis for resolving international disputes which is compatible with sovereignty. In achieving this objective, the author has produced a major work that is of immeasurable value to tax advisers, government and governance officials, academics, and researchers both in developing international taxation strategies and in helping to resolve disputes with tax authorities.
