Copyright Office, 1979 National Audit Office (NAO) - Cabinet Office: Managing Government Suppliers - HC 811 Great Britain: National Audit Office, 2013-11-12 In this memorandum Managing government suppliers the NAO welcomes the fact that the Cabinet Office is now asserting government's position with contractors in way that its scale as a customer merits Specifically this has enabled government to get greater value from contracting and has sent signals that government is willing to be tough on underperformance However the Cabinet Office still faces a number of challenges in developing a more mature approach It is currently focused on short term savings and has adopted a robust approach with departments and suppliers which has enabled it to report significant savings from contract renegotiations However this approach will become harder over time and risks missing out on achieving longer term value for money through innovation and investment There is a balance to be struck between tough negotiations and maintaining relationship with suppliers in the long term if government is to maintain competition in public sector markets The Cabinet Office is seeking to reform commercial practice across Government with the development of the Crown Commercial Service There is a risk that the ambitions are not matched by the right resources capability and information It has gaps in commercial experience and expertise below senior levels while its information on its 40 strategic suppliers is inconsistent and incomplete A related report The role of major contractors in the delivery of public services HC 810 session 2013 14 ISBN 9780102987027 sets out some of the benefits that can be achieved through contracting but highlights issues that deserve greater public scrutiny Annual Report of the General Accounting Office United States. How to Audit the Process-Based QMS Dennis R. Arter, Charles A. Cianfrani, John (Jack) E. West, 2012-08-17 This book is intended to help those involved in managing and conducting audits to ISO 9001 2008 It can be used as a guide to establishing a new audit program or for revitalizing one that has been operational for some time It focuses on achieving an audit program that produces value adding results for the organization Arter Cianfrani and West experts in both ISO 9001 and auditing believe that the art and science of auditing quality management systems that have been designed and implemented following the process approach the foundation of ISO 9001 2008 is more challenging and interesting than auditing discrete elements to determine whether documented procedures and records exist Auditing a process based QMS or even small

elements of such a system requires auditors to understand and integrate into an audit all aspects of organizational activities from high level planning through ensuring that customers are satisfied The role of auditing is evolving and the skills and competence required to do it well also must evolve The contents of this book will help auditors understand their role in the organization and discharge their auditing duties in a way that is challenging to them and contributes to the success of the organization
