**van Firdgum** Daniël Postma, 2015-09-01 Het Fries Groningse kustgebied vormt een van de rijkste archeologische landschappen van Nederland. Het bestond oorspronkelijk uit vruchtbare kweldergebieden, een weids en boomloos landschap waarin het goed boeren was mits men voldoende rekening hield met de zee. Welbekend zijn de terpen en wierden, de kunstmatig opgeworpen woonheuvels die de kustbewoners en hun kostbaarste goed tegen de hoogste vloed beschermden. Veel minder bekend is dat ook de architectuur er sterk door de zee beïnvloed werd. Vooral in de vroege middeleeuwen kwam de nauwe relatie tussen landschap en bouwtraditie optimaal in de terpboerderijen tot uiting: opgegraven plattegronden uit de vijfde tot en met de zevende eeuw bestonden uit weinig meer dan dikke muren van gestapelde kleizoden. Ondanks hun streekgebonden uiterlijk waren deze zodenhuizen op dezelfde leest geschoeid als de houten woonstalhuizen die elders in het zuidelijke Noordzeegebied gebouwd werden. Daarom is onderzoek aan de terpboerderij ook relevant voor de niet-Friese archeologie. Het kan hieraan zelfs extra bijdragen omdat terpen en wierden de archeologische resten zo uitzonderlijk goed conserveren. Waar elders van boerderijen meestal niet meer dan paalsporen worden blootgelegd, blijken in terpen de zodenmuren nog tot wel 70 cm hoogte overeind te staan. In deze eerste uitgave van het Terpencentrum van de Rijksuniversiteit Groningen zal blijken dat de lang vergeten zodenbouw tot in detail te achterhalen is. Gaandeweg wordt duidelijk dat de Noord-Nederlandse boerderijen in de vroege middeleeuwen veel duurzamer gebouwd en onderhouden werden dan tot nu toe werd gedacht. Kundig gebruikmakend van natuurlijke bouwmaterialen uit de eigen regio wist men al vroeg stabiele houtconstructies op te trekken die mede vanwege hun boogvorm significant afweken van de latere rechthoekige gebinten. Tot tweemaal toe wordt een vroegmiddeleeuws zodenhuis in het echt nagebouwd om zo de belangrijkste ideeën in een ambitieus archeologisch experiment op de proef te stellen. Daarmee komt de oudste middeleeuwse boerderijbouw in een volledig nieuw daglicht te staan; het verschil met de historisch bekende boerderijbouw kan haast niet groter. Daniël Postma, Aberdeen, Schotland, 1983, studeerde Pre- en Protohistorie van Noordwest-Europa aan de Rijksuniversiteit Groningen. In 2006 was hij betrokken bij het steilkantonderzoek aan een terp bij Anjum. Freuen in meerdere opzichten belangrijke opgraving waarover hij ook publiceerde. Sinds 2011 is hij als promovendus verbonden aan het Groninger Instituut voor Archeologie. Hij bestudeert de vroegmiddeleeuwse bouwtraditie van het Noord-Nederlandse kustgebied. In het kader van dit onderzoek bouwde hij het zodenhuis waarover dit boek handelt. Winnaar Universitaire Masterscriptie, Waddenacademieprijs 2012. Fotografie en opmaak: Frans de Vries. Toonbeeld: *The 'One Planet' Life*, David Thorpe, 2014-11-13. The One Planet Life demonstrates a path for everyone towards a way of life in which we don't act as if we had more than one planet Earth. The difference between this approach and others is that it uses ecological footprint analysis to help to determine how effective our efforts are. Much of the book is a manual with examples on how to live the good life and supply over 65% of your livelihood from your land with mostly positive impacts upon the environment. It examines the pioneering Welsh policy. One Planet Development then considers efforts towards one planet living in urban areas. After a

foreword by BioRegional One Planet Living co founder Pooran Desai and an introduction by former Welsh environment minister Jane Davidson the book contains An essay arguing that our attitude to planning land and development needs to change to enable truly sustainable development Guidelines on finding land finance and creating a personal plan for one planet living Detailed guides on sustainable building supplying your own food generating renewable energy reducing carbon emissions from travel land management water supply and waste treatment 20 exemplary examples at all scales from micro businesses to suburbs followed by Jane Davidson s Afterword The book will interest anyone seeking to find out how a sustainable lifestyle can be achieved It is also key reading for rural and built environment practitioners and policy makers keen to support low impact initiatives and for students studying aspects of planning geography governance sustainability and renewable energy
