The Changing Wildlife of Great Britain and Ireland David L. Hawksworth, 2003-06-26 Periodic comprehensive overviews of the status of the diverse organisms that make up wildlife are essential to determining trends threats and future prospects Just over 25 years ago leading authorities on different kinds of wildlife came together to prepare an assessment of their status of a wide range of organisms in Great Britain and Ireland in *The Changing Flora and Fauna of Britain* also edited by Professor David L Hawksworth CBE Now in *The Changing Wildlife of Great Britain and Ireland* he has gathered together some of the original and also new contributors to review changes since that time and look to the future Contributions range from viruses diatoms fungi lichens mites and nematodes through butterflies dragonflies flies and slugs to flowering plants ferns mammals birds and fish The state of knowledge in different groups is assessed and the effectiveness of statutory and other measures taken to safeguard wildlife considered The picture is far from bleak ameliorating sulphur dioxide levels have benefited sensitive lichens and mosses in a dramatic way water quality improvement has been beneficial there have been few certain extinctions and rediscoveries of species thought to have been lost Biodiversity Action Plans have also benefited targeted species but habitat restoration and management for some is not always good for others But there are worrying trends in declining populations with an increasing number being regarded as threatened or endangered especially in agricultural areas and where woodland management has changed particular threats from introduced species and concern over the effects of climate change Some of the smaller organisms remain poorly known a situation unlikely to change as expertise in many is scant or being lost This stock check and look to the future will be a key source book to conservationists naturalists and professional biologists for many years to come

Avery, 2015-07-30 ONE OF 2015'S BOOKS OF THE YEAR IN THE TIMES AND THE MAIL ON SUNDAY A hard hitting passionate and well researched book about the conflict between driven grouse shooting and nature conservation in Britain with a foreword by Chris Packham Driven grouse shooting where flocks of Red Grouse are chased by lines of beaters so that they fly over lines of guns that shoot the fast flying birds is a peculiarly British fieldsport It is also peculiarly British in that it is deeply rooted in the British class system This multi million pound business dominates the hills of the north of England the Pennines the North Yorkshire Moors the Cheviots and throughout Scotland Grouse shooting is big business VERY big business And backed by powerful wealthy lobbying groups its tendrils run throughout British society Inglorious makes the case for banning driven grouse shooting The facts and arguments are presented fairly but the author Mark Avery states from the start why he has after many years of soul searching come down in favour of an outright ban There is too much illegal killing of wildlife such as Buzzards Golden Eagles and most egregiously of all Hen Harriers and as a land use it wrecks the ecology of the hills However grouse shooting is economically important and it is a great British tradition All of these and other points of view are given fair and detailed treatment and analysis and the author talks to a range of people on different

sides of the debate The book also sets out Avery s campaign with Chris Packham to gain support for the proposal to ban grouse shooting culminating in Hen Harrier Day timed to coincide with the Glorious 12th This new paperback edition includes new material on what went on in 2015 including the devastating floods of that winter bringing the story right up to date Mark Avery continues to stir up a debate about fieldsports the countryside and big business in a book that all British conservationists will want to read
