access mitigate the impact of seasonality on child growth? Abay, Kibrewossen, Hirvonen, Kalle, 2016-03-01 Seasonality in agricultural production continues to shape intra annual food availability and prices in low income countries Using high frequency panel data from northern Ethiopia this study attempts to quantify seasonal fluctuations in children s weights In line with earlier studies we document considerable seasonality in children s age and height adjusted weights While children located closer to local food markets are better nourished compared to their counterparts residing in more remote areas their weights are also subject to considerable seasonality Further analysis provides evidence that children located closer to food markets consume more diverse diets than those located farther away However the content of these diets varies across

seasons children are less likely to consume animal source foods during the lean season

Groundwater in Ethiopia Seifu Kebede, 2012-08-01 This book provides a comprehensive description of groundwater resources in Ethiopia and its various dimensions groundwater as resource environmental functions and socioeconomics The prevailing knowledge of groundwater resources in Ethiopia or elsewhere in Sub Saharan Africa was based on geological and stratigraphic framework known nearly four decades ago mainly 1960s and 70s Thanks to the substantial geoscientific research since the 70s a new set of relevant geological stratigraphic data has been created that helps to re define our understanding of groundwater resources in Africa as a whole and in Ethiopia in particular a For the first time the basement aquifer of Ethiopia has been described hydrogeologically based on genesis of regoliths deep weathering and striping history clear regional difference in groundwater potential is shown for the first time comparative accountancy has been given regarding groundwater occurrence in

the generally low grade basement rocks of Ethiopia Arabian Nubian shield and high grade basement rocks of the rest of Africa b For the first time groundwater occurrence in multilayered sedimentary rocks account for spatial variation in degree of karstification deformation history and stratigraphy c The vast volcanic aquifers of Ethiopia which have previously classified based on their ages are now reclassified based on age morphology eg groundwater in plateau volcanics groundwater in shield volcanics and aquifer structure d The loose alluvio lacustrine sediments which were known as least extensive in previous works based on areal cover are in fact shown to host the most voluminous groundwater resources in Ethiopia These aquifers have now been described based on their geomorphology extent and genesis The aim of this book is to use these newly created knowledge to redefine the understanding of groundwater resources in Ethiopia
