Securing Outer Space Securing Outer Space:

Securing Outer Space Natalie Bormann, Michael Sheehan, 2009-01-30 This edited volume analyses a number of controversial policies and strategies relating to Space activities and to place these in a broader theoretical perspective The book reveals the relationship between activities in Outer Space and terrestrial international relations

Securing Outer Space Natalie Bormann, Michael J. Sheehan, 2009 This book explores the questions Outer Space raises for our understanding of terrestrial international relations

Militarizing Outer Space Alexander C.T. Geppert, Daniel Brandau, Tilmann Siebeneichner, 2020-12-02 Militarizing Outer Space explores the dystopian and destructive dimensions of the Space Age and challenges conventional narratives of a bipolar Cold War rivalry Concentrating on weapons warfare and violence this provocative volume examines real and imagined endeavors of arming the skies and conquering the heavens The third and final volume in the groundbreaking European Astroculture trilogy Militarizing Outer Space zooms in on the interplay between security technopolitics and knowledge from the 1920s through the 1980s Often hailed as the site of heavenly utopias and otherworldly salvation outer space transformed from a promised sanctuary to a present threat where the battles of the future were to be waged Astroculture proved instrumental in fathoming forms and functions of warfare's futures past both on earth and in space The allure of dominating outer space the book shows was neither limited to the early twenty first century nor to current American space force rhetorics

The Geopolitics of Deep Oceans John Hannigan, 2015-11-30 Long regarded as an empty and inhospitable environment the deep ocean is rapidly emerging as an ecological hot spot with a remarkable diversity of biological life Yet the world's oceans are currently on a dangerous trajectory of decline threatened by acidification oil and gas drilling overfishing and in the long term deep sea mining bioprospecting and geo engineering In *The Geopolitics of Deep Oceans* noted environmental sociologist John Hannigan examines the past present and future of our planet's final frontier The author argues that our understanding of the deep its definition boundaries value ownership health and future state depends on whether we see it first and foremost as a resource cornucopia a political chessboard a shared commons or a unique and threatened ecology He concludes by locating a new storyline that imagines the oceans as a canary in the mineshaft for gauging the impact of global climate change *The Geopolitics of Deep Oceans* is a unique introduction to the geography law politics and sociology of the sub surface ocean It will appeal to anyone seriously concerned about the present state and future fate of the largest single habitat for life on our planet

The New Spatiality of Security Caroline M. Croser, 2010-11-01 This book provides a rigorous critical analysis of how the US military operates in Iraq exploring the spatial practices of violence Contemporary critical analyses of the United States involvement in Iraq and Afghanistan emphasise the hegemonic nature of the US military experience while conventional military analyses focus on fixed categories such as counter insurgency or network centric warfare Drawing on fieldwork examining the use of a new command and control technology by 1st Cavalry Division US Army in 2004 2005 this book elaborates a more nuanced understanding of US

military violence by exploring the changing and sometimes incoherent spatial practices through which violence was exercised The author combines fieldwork with a spatial vocabulary of violence from the work of Michel Foucault Henri Lefebvre and Gilles Deleuze and Félix Guattari and methodological inspiration from the micro observations of material semiotics in Science and Technology Studies to conclude that the US Army's experience in Iraq has been neither as circumscribed nor as easily defined as critical theorists and conventional military analysts alike would suggest This innovative book will be of much interest to students of critical security studies strategic studies military studies social and spatial theory and IR in general Caroline M Croser is a Lecturer in Politics at the University of New South Wales at the Australian Defence Force Academy where she teaches defence studies

Gender, Human Security and the United Nations Natalie Florea Hudson, 2009-09-22 This book
 examines the relationship between women gender and the international security agenda exploring the meaning of security in
 terms of discourse and practice as well as the larger goals and strategies of the global women s movement Today many
 complex global problems are being located within the security logic From the environment to HIV AIDS state and non state
 actors have made a practice out of securitizing issues that are not conventionally seen as such As most prominently
 demonstrated by the UN Security Council Resolution 1325 2001 activists for women s rights have increasingly framed
 women s rights and gender inequality as security issues in an attempt to gain access to the international security agenda
 particularly in the context of the United Nations This book explores the nature and implications of the use of security
 language as a political framework for women tracing and analyzing the organizational dynamics of women s activism in the
 United Nations system and how women have come to embrace and been impacted by the security framework globally and
 locally The book argues that from a feminist and human security perspective efforts to engender the security discourse have
 had both a broadening and limiting effect highlighting reasons to be sceptical of securitization as an inherently beneficial
 strategy Four cases studies are used to develop the core themes 1 the campaign to implement UN Security Council
 Resolution 1325 2 the strategies utilized by those advocating women s issues in the security arena compared to those
 advocating for children 3 the organizational development of the UN Development Fund for Women and how it has come to
 securitize women and 4 the activity of the UN Peacebuilding Commission and its challenges in gendering its security
 approach The work will be of interest to students of critical security gender studies international organizations and
 international relations in general Natalie Florea Hudson received her PhD in Political Science from the University of
 Connecticut and is an Assistant Professor at the University of Dayton She specializes in gender and international relations

human rights international security studies and international law and organization *Yearbook on Space Policy 2017*

Edward Burger, Giulia Bordacchini, 2019-02-12 The book describes the recent trends in space policy and the space sector overall While maintaining a global scope with a European perspective it links space policy with other policy areas highlights major events and provides insights on the latest data The Yearbook includes the proceedings of ESPI's 12th Autumn Conference which discussed the growing importance of Security in Outer Space and the stakes for civilian space programmes in the public and private sectors Bringing together satellite operators SMEs European and American institutions and think tanks the Autumn Conference served as platform for fresh insights on security in outer space and the potential of transatlantic relations to address its challenges The Yearbook also includes executive summaries of ESPI's work in 2017 as well as ESPI's 2017 Executive Briefs covering topics such as suborbital spaceflight super heavy lift launch vehicles collaboration with China and the delimitation of outer space All in all the book gives a detailed review of space policy developments worldwide contextualised with information about national level space industries and activity and broader political and economic conditions The readership is expected to include the staff of space agencies the space industry and the space law and policy research community **The Routledge Handbook of Law and the Anthropocene** Peter D. Burdon, James Martel, 2023-05-15 The Routledge Handbook of Law and the Anthropocene provides a critical survey into the function of law and governance during a time when humans have the power to impact the Earth system The Anthropocene is a crisis of the earth system This book addresses its implications for law and legal thinking in the twenty first century Unpacking the challenges of the Anthropocene for advocates of ecological law and politics this handbook pursues a range of approaches to the scientific fact of anthropocentrism with contributions from lawyers philosophers geographers and environmental and political scientists Rather than adopting a hubristic normativity the contributors engage methods concepts and legal instruments in a way that underscores the importance of humility and an expansive ethical worldview Contributors to this volume are leading scholars and future leaders in the field Rather than upholding orthodoxy the handbook also problematizes received wisdom and is grounded in the conviction that the ideas we have inherited from the Holocene must all be open to question Engaging such issues as the Capitalocene Gaia theory the rights of nature posthumanism the commons geoengineering and civil disobedience this handbook will be of enormous interest to academics students and others with interests in ecological law and the current environmental crisis **The Routledge Handbook of European Security Law and Policy** E. Conde, Zhaklin V. Yaneva, Marzia Scopelliti, 2019-10-11 The Handbook of European Security Law and Policy offers a holistic discussion of the contemporary challenges to the security of the European Union and emphasizes the complexity of dealing with these through legislation and policy Considering security from a human perspective the book opens with a general introduction to the key issues in European Security Law and Policy before delving into three main areas Institutions policies and mechanisms used by Security Defence Policy and Internal Affairs form the

conceptual framework of the book at the same time an extensive analysis of the risks and challenges facing the EU including threats to human rights and sustainability as well as the European Union's legal and political response to these challenges is provided This Handbook is essential reading for scholars and students of European law security law EU law and interdisciplinary legal and political studies
