Environmental Law, and Sustainable Development in the Global South Kirk W. Junker, Paolo Davide Farah, 2021-11-29 This volume examines the impact of globalization on international environmental law and the implementation of sustainable development in the Global South Comprising contributions from lawyers from the Global South or who have experience in the Global South this volume is organized into three parts with a thematic inquiry woven through every chapter to ask how law can enable economies that can be sustained given the limited carrying capacity of the earth Part I describes and characterizes the status quo of environmental and economic problems in the Global South during the process of globalization Some of those problems include redistribution of environmental burden on the public through over reliance on the state in emerging economies and the transition to public private partnerships as well as extreme uncontrolled economic expansion Building on Part I Part II takes an international perspective by presenting some tools that are in place during the process of globalization that lead to friction and interfaces between developed and developing economies in environmental law Recognizing the impossibility of a globalized Northern economy the authors in Part III present some alternatives through framework ideas of human and civil rights environmental rights and indigenous persons rights as well as concrete and

specific legal tools to strengthen justice and rule of law institutions The book gives new perspectives to familiar approaches through concrete examples by professional practitioners and theoretical discourse by academic researchers and can thereby form the basis for changes in practices as well as further discussions and comparisons This book will be of great interest to students and scholars of environmental law sustainable development and globalization and international relations as well as legal professionals and practitioners Chasing Criminal Money Katalin Ligeti, Michele Simonato, 2017-04-06 The fight against dirty money is not a new topic nor a recent problem It has existed within international and national agendas since the 1980s Nonetheless the evolving complexity of criminal skills and networks the increasingly global dimension of crime the financial crisis and the alleged unsatisfactory results of the efforts hitherto undertaken cause us to re pose and re discuss some questions This book addresses several issues concerning the reasons objectives and scope of national and supranational strategies targeting criminal money as well as the concrete modalities to overcome its obstacles The main objective is to explore where the EU stands and where it ought to go providing useful input for policy makers and further research Nevertheless the problems are not limited to the EU area and assets particularly money cross EU borders much more easily than people do The reflections developed in the chapters therefore aim at going beyond these EU borders The book is divided into two parts The first one focuses on the core of asset recovery policies namely confiscation or forfeiture laws and explores in particular some issues concerning the respect of fundamental rights The second part addresses other problematic aspects related to the asset recovery process such as the return of assets to victim countries the cross border investigations on dirty money and the social use of confiscated assets *Socio-Economic Human Rights in Essential Public Services Provision* Marlies Hesselman, Antenor Hallo de Wolf, Brigit Toebes, 2016-11-10 There is a clear overlap between securing socio economic human rights for all persons and arranging adequate access to essential public services across society Both are necessary to realise thriving inclusive societies with adequate living standards for all based on human dignity This edited volume brings together the two topics for the first time In particular it identifies the common challenges for essential public services provision and socio economic human rights realisation and it explores how socio economic rights law can be harnessed to reinforce better access to services An important aim of this book is to understand how international socio economic human rights law and guideposts can be used and strengthened to improve access to services and assess socio economic legal and policy decisions The volume includes contributions from different continents on a range of different services and engages with the realities of different regulatory settings After an introduction that sets out the most important challenges for universal access to services including sufficient resources mobilisation private actor involvement and regulation or the need for improved checks and balances the book goes on to discuss current issues in services provision and socio economic rights as well as explores the place and role of private business actors in the provision of services In particular it assesses how the responsibility and accountability of such actors for human rights can be improved The final

part of the book narrows in on the under explored human rights concepts of participation and accountability as essential prerequisites for better checks and balances Overall this volume presents a unique and powerful illustration of how socio economic human rights law supports improved access to essential public services for all
