Staub,2018-09-25 The 1954 Brown v Board of Education decision required desegregation of America s schools but it also set in motion an agonizing multidecade debate over race class and IQ In this innovative book Michael E Staub investigates neuropsychological studies published between Brown and the controversial 1994 book The Bell Curve In doing so he illuminates how we came to view race and intelligence today In tracing how research and experiments around such concepts as learned helplessness deferred gratification hyperactivity and emotional intelligence migrated into popular culture and government policy Staub reveals long standing and widespread dissatisfaction not least among middle class whites with the metric of IQ He also documents the devastating consequences above all for disadvantaged children of color as efforts to undo discrimination and create enriched learning environments were recurrently repudiated and defunded By connecting psychology race and public policy in a single narrative Staub charts

the paradoxes that have emerged and that continue to structure investigations of racism even into the era of contemporary neuroscientific research **Educational Transformation: 21st century skills and challenges for higher education**
