Self-Organizing Maps Teuvo Kohonen, 2012-12-06 Since the second edition of this book came out in early 1997 the number of scientific papers published on the Self Organizing Map SOM has increased from about 1500 to some 4000 Also two special workshops dedicated to the SOM have been organized not to mention numerous SOM sessions in neural network conferences In view of this growing interest it was felt desirable to make extensive revisions to this book They are of the following nature Statistical pattern analysis has now been approached more carefully than earlier A more detailed discussion of the eigenvectors and eigenvalues of symmetric matrices which are the type usually encountered in statistics has been included in Sect 1 1 3 also new probabilistic concepts such as factor analysis have been discussed in Sect 1 3 1 A survey of projection methods Sect 1 3 2 has been added in order to relate the SOM to classical paradigms Vector Quantization is now discussed in one main section and derivation of the point density of the codebook vectors using the calculus of variations has been added in order to familiarize the reader with this otherwise complicated statistical analysis It was also felt that the discussion of the neural modeling philosophy should include a broader perspective of the main issues A historical review in Sect 2 2 and the general philosophy in Sects 2 3 2 5 and 2 14 are now expected to especially help newcomers to orient themselves better amongst the profusion of contemporary neural models *Applications of Self-Organizing Maps* Magnus

Yin, Lesley Allinson, Jon Slack, 2012-12-06 This is the third Workshop on Self Organising Maps WSOM and its related techniques The previous two were held in Helsinki 1997 and 1999 and confirmed the vitality of the SOM as one of the most popular and powerful concepts for unsupervised pattern recognition and data visualisation These meetings not only acted as a showcase for the latest advances in SOM theory and for illustrating its vast range of applicability but also as venues where much informal and fruitful interaction could take place It is interesting to observe the development of the original SOM and this remarkable progress confirms the originality and insight of Teuvo Kohonen's pioneering work With the range and quality of the papers in this volume the stage is set for another very successful meeting This volume is a permanent record of all the contributions presented during WSOM OI held at the University of Lincolnshire and Humberside 13-15 June 2001 The University is the newest of England's universities but it is situated in the heart of one of our oldest cities founded by the Romans and overlooked by the towering mass of its medieval cathedral Primarily Lincoln has always been a centre for the rich agricultural heartland of England however it was the birthplace 186 years ago of George Boole So WSOM OI is continuing Lincoln's long and honourable tradition of advancing scientific understanding
