Designing Democratic Schools and Learning Environments Linda F. Nathan, Jonathan F. Mendonca, Gustavo Rojas Ayala, 2024-03-06 This open access book explores democratic schools and learning environments globally. The book focuses on a newly developed framework for democratic education. The authors describe existing schools and concept schools, those that are ideas but not in operation. The first section includes the editors' own journeys. Pillar 1 includes schools that emphasize the open flow of ideas and choices regardless of their popularity. Pillar 2 maintains that it is impossible to have a high quality education that ignores equity. Chapters explore how many diverse marginalized communities experience education and some innovations that hold great promise for inclusion. Pillar 3 provides examples of schools where active engagement, consensus, and compromise support the common good. Pillar 4 investigates schools which organize students, parents, social institutions, and the larger community collaboratively to achieve its goals and to solve their and society's most urgent challenges.

Travel back to ancient times to experience the first voting system. Explore the concept of a democratic government and whether it truly represents the people. Discover how the president has to share powers with the legislature in a presidential system. Explain why it is easier to pass laws in the parliamentary system than in the presidential system. Roleplay as a member of Parliament and deliver a 90-second statement about an important issue. Find out why most dictators were military leaders and how the role of dictator has changed over time. Learn about suffrage and what the requirements are for a citizen to be allowed to vote. Hold your own election to decide on a policy for running your classroom. Aligned to your State Standards and written to Bloom's Taxonomy, additional writing tasks, crossword, word search, comprehension quiz, and answer key are also included. **Engaging the Disengaged** Lois Brown Easton, 2008 An inspiring book. Based on Lois Brown Easton's experience working with disengaged learners, this insightful resource helps educators make positive connections with youngsters of all ages who are at risk of failing or dropping out. Featuring the voices of educators and students, this invaluable text covers methods for improving the schoolwide climate in ways that support all students and for creating a learning environment that promotes academic, personal, and social growth. The author illustrates how to make meaningful changes in curriculum and instruction and examines the importance of teacher-student relationships. Innovative teaching strategies for struggling learners. Developing self-directed learners. Using appropriate assessments for students with learning difficulties. Easton's book inspires teachers to make a significant change in their school's culture to engage developing minds and champion all learners regardless of socioeconomic factors.

Multiple intelligences (MI) as a cognitive psychology theory has significantly influenced learning and teaching. Research has demonstrated a strong association between individual intelligences and their cognitive processes and behaviors. However, it remains unknown how each of or a combination of these intelligences can be effectively optimized through instructional intervention, particularly through the use of emerging learning technology. On the other hand, while efforts have been made to unveil the relationship between information and communication technology (ICT) and individual learner performance, there is a lack of knowledge in how MI theory may guide the use of ICTs to enhance learning opportunities for students. *Examining Multiple Intelligences and Digital Technologies for Enhanced Learning Opportunities* is an essential reference book that generates new knowledge about how ICTs can be utilized to promote MI in various formal and informal learning settings. Featuring a range of topics such as augmented reality, learning analytics, and mobile learning, this book is ideal for teachers, instructional designers, curriculum developers, ICT specialists, educational professionals, administrators, instructors, academicians, and researchers.
