Selected Papers Of Frederick Mosteller Springer Series In Statistics:

Selected Papers of Frederick Mosteller Stephen E. Fienberg, David C. Hoaglin, 2007-02-01 One of the best known statisticians of the 20th century Frederick Mosteller has inspired numerous statisticians and other scientists by his creative approach to statistics and its applications This volume collects 40 of his most original and influential papers capturing the variety and depth of his writings It is hoped that sharing these writings with a new generation of researchers will inspire them to build upon his insights and efforts

Selected Papers of Hirotugu Akaike Emanuel Parzen, Kunio Tanabe, Genshiro Kitagawa, 2012-12-06 The pioneering research of Hirotugu Akaike has an international reputation for profoundly affecting how data and time series are analyzed and modelled and is highly regarded by the statistical and technological communities of Japan and the world His 1974 paper A new look at the statistical model identification IEEE Trans Automatic Control AC 19 716 723 is one of the most frequently cited papers in the area of engineering technology and applied sciences according to a 1981 Citation Classic of the Institute of Scientific Information It introduced the broad scientific community to model identification using the methods of Akaike s criterion AIC The AIC method is cited and applied in almost every area of physical and social science The best way to learn about the seminal ideas of pioneering researchers is to read their original papers This book reprints 29 papers of Akaike s more than 140 papers This book of papers by Akaike is a tribute to his outstanding career and a service to provide students and researchers with access to Akaike s innovative and influential ideas and applications To provide a commentary on the career of Akaike the motivations of his ideas and his many remarkable honors and prizes this book reprints A Conversation with Hirotugu Akaike by David F Findley and Emanuel Parzen published in 1995 in the journal Statistical Science This survey of Akaike s career provides each of us with a role model for how to have an impact on society by stimulating applied researchers to implement new statistical methods

ARCH Models and Financial Applications Christian Gouriéroux, 2012-12-06 The classical ARMA models have limitations when applied to the field of financial and monetary economics Financial time series present nonlinear dynamic characteristics and the ARCH models offer a more adaptive framework for this type of problem This book surveys the recent work in this area from the perspective of statistical theory financial models and applications and will be of interest to theorists and practitioners From the view point of statistical theory ARCH models may be considered as specific nonlinear time series models which allow for an exhaustive study of the underlying dynamics It is possible to reexamine a number of classical questions such as the random walk hypothesis prediction interval building presence of latent variables etc and to test the validity of the previously studied results There are two main categories of potential applications One is testing several economic or financial theories concerning the stocks bonds and currencies markets or studying the links between the short and long run The second is related to the interventions of the banks on the markets such as choice of optimal portfolios hedging portfolios values at risk and the size and times of block trading

Global Pandemic and Human Security Rajib

Shaw, Anjula Gurtoo, 2022-03-01 This book highlights how the human security aspect has been affected by the global pandemic based on the specific case study field data and evidence COVID 19 has exemplified that the pandemic is global but its responses are local The responses depend on national governance and policy framework use of technology and innovation and people's perceptions and behavior among many others There are many differences in how the pandemic has affected the rich and the poor urban and rural sectors development and fiscal sectors and developed and developing nations and communities Echoing human security principles the 2030 Agenda emphasized a world free of poverty hunger disease and want free of fear and violence with equitable and universal access to quality education health care and social protection to safe drinking water and sanitation where food is sufficient safe affordable and nutritious where habitats are safe resilient and sustainable and where there is universal access to affordable reliable and sustainable energy These basic human security PA1 principles and development agenda are highly affected by the global pandemic worldwide irrespective of its development and economic status Thus the book highlights the nexus between human security and development issues It has two major pillars one is the development and the other is technology issues These two inter dependent topics are discussed in the perspective of the global pandemic making this the most important feature of this book While the world is still in the middle of a pandemic and possibly other natural and biological hazards may affect people's lives and livelihoods in the future this book provides some key learning which can be used to cope with future uncertainties including climate risks Thus the book is timely and relevant to wider readers

Statistical Inference in Science D.A. Sprott, 2008-01-28 A treatment of the problems of inference associated with experiments in science with the emphasis on techniques for dividing the sample information into various parts such that the diverse problems of inference that arise from repeatable experiments may be addressed A particularly valuable feature is the large number of practical examples many of which use data taken from experiments published in various scientific journals This book evolved from the authors own courses on statistical inference and assumes an introductory course in probability including the calculation and manipulation of probability functions and density functions transformation of variables and the use of Jacobians While this is a suitable text book for advanced undergraduate Masters and Ph D statistics students it may also be used as a reference book

Correlated Data Analysis: Modeling, Analytics, and Applications Xue-Kun Song, Peter X. -K. Song, 2007-07-27 This book covers recent developments in correlated data analysis It utilizes the class of dispersion models as marginal components in the formulation of joint models for correlated data This enables the book to cover a broader range of data types than the traditional generalized linear models The reader is provided with a systematic treatment for the topic of estimating functions and both generalized estimating equations GEE and quadratic inference functions QIF are studied as special cases In addition to the discussions on marginal models and mixed effects models this book covers new topics on joint regression analysis based on Gaussian copulas

Logic and Uncertainty in the Human Mind Shira Elqayam, Igor Douven, Jonathan St B. T. Evans, Nicole

Cruz,2020-06-10 David E Over is a leading cognitive scientist and with his firm grounding in philosophical logic he also exerts a powerful influence on the psychology of reasoning He is responsible for not only a large body of empirical work and accompanying theory but for advancing a major shift in thinking about reasoning commonly known as the new paradigm in the psychology of human reasoning Over s signature mix of philosophical logic and experimental psychology has inspired generations of researchers psychologists and philosophers alike over more than a quarter of a century The chapters in this volume written by a leading group of contributors including a number who helped shape the psychology of reasoning as we know it today each take their starting point from the key themes of Over s ground breaking work The essays in this collection explore a wide range of central topics such as rationality bias dual processes and dual systems as well as contemporary psychological and philosophical theories of conditionals It concludes with an engaging new chapter authored by David E Over himself which details and analyses the new paradigm psychology of reasoning This book is therefore important reading for scholars researchers and advanced students in psychology philosophy and the cognitive sciences including those who are not familiar with Over s thought already

Multiscale Modeling Marco A.R. Ferreira,Herbert K.H. Lee,2007-07-27 This highly useful book contains methodology for the analysis of data that arise from multiscale processes It brings together a number of recent developments and makes them accessible to a wider audience Taking a Bayesian approach allows for full accounting of uncertainty and also addresses the delicate issue of uncertainty at multiple scales These methods can handle different amounts of prior knowledge at different scales as often occurs in practice

Introduction to Empirical Processes and Semiparametric Inference Michael R. Kosorok,2007-12-29 The goal of this book is to introduce statisticians and other researchers with a background in mathematical statistics to empirical processes and semiparametric inference These powerful research techniques are surpr ingly useful for studying large sample properties of statistical estimates from realistically complex models as well as for developing new and proved approaches to statistical inference This book is more of a textbook than a research monograph although a number of new results are presented The level of the book is more troductory than the seminal work of van der Vaart and Wellner 1996 In fact another purpose of this work is to help readers prepare for the mathematically advanced van der Vaart and Wellner text as well as for the semiparametric inference work of Bickel Klaassen Ritov and We ner 1997 These two books along with Pollard 1990 and Chapters 19 and 25 of van der Vaart 1998 formulate a very complete and successful elucidation of modern empirical process methods The present book owes much by the way of inspiration concept and notation to these previous works What is perhaps new is the gradual yetrigorous anduni ed way this book introduces the reader to the eld

Multiple Testing Procedures with Applications to Genomics Sandrine Dudoit,Mark J. van der Laan,2007-12-18 This book establishes the theoretical foundations of a general methodology for multiple hypothesis testing and discusses its software implementation in R and SAS These are applied to a range of problems in biomedical and genomic research including identification of differentially expressed and co expressed

genes in high throughput gene expression experiments tests of association between gene expression measures and biological annotation metadata sequence analysis and genetic mapping of complex traits using single nucleotide polymorphisms The procedures are based on a test statistics joint null distribution and provide Type I error control in testing problems involving general data generating distributions null hypotheses and test statistics
